¹H NMR Ganglioside Ceramide Resonance Region on the Differential Diagnosis of Low and High Malignancy of Brain Gliomas, by V. Lombardi, L. Valko, M. Valko, A. Scozzafava, H. Morris, M. Melnik, J. Svitel, M. Budeřinský, J. Pelnár, J. Steno, T. Liptaj, L. Zalibera, J. Budinská, J. Zlatos, A. Giuliani, L. Mascolo, and D. Leibfritz, Volume 17, Number 5 (October 1997), pp. 521–535

The following authors were inadvertently left off the published version of the above paper:

- A. Troncone, Inst. of Veterinary Pathol. Anatomy, University of Bari, 1-701 26 Bari, Italy;
- F. Marzullo, Dept. of Pathological Anatomy, Oncology Center Bari, 1-701 25 Bari, Italy;
- M. Mazur, Department of Physical Chemistry, Slovak Technical University, SK812 37 Bratislava, Slovak Republic; and
- J. Klenner and Eduard Zverina, Dept. Neurosurgery Military Hospital, Charles University Medical School of Prague, Prague, Czech Republic.

The Acknowledgments on page 532 should have read:

We thank Professor I. Bertini, Head of the Chemistry Department, University of Firenze, for the use of the Bruker 600-MHz NMR Spectrometer. We also thank Dr. K. Onuska for critical reading of our manuscript and Dr. S. Tommasi, Dr. C. Gianella (Oncology Institute of Bari), and Dr. Budesinka (Charles University, Prague) for preparation of samples.

Also, on page 522 the end of the second sentence in the bottom paragraph should have read: there have been no NMRS studies of the ceramide portion of Gls in brain gliomas.
