

# ORIGINS OF LIFE AND EVOLUTION OF THE BIOSPHERE

## INSTRUCTIONS FOR AUTHORS

### EDITOR-IN-CHIEF

Professor Alan W. Schwartz, Laboratory for Evolutionary Biology, Faculty of Science, University of Nijmegen, PO Box 9010, 6500 GL Nijmegen (courier address: Room A2055, Toernooiveld 1, 6525 ED Nijmegen), The Netherlands.

### AIMS AND SCOPE

#### **Origins of Life, Early Evolution, Astrobiology/Exobiology**

While any scientific study related to the origin of life has its place in the journal, some examples of important areas of interest are: prebiotic chemistry; self replicating systems; the theory of the RNA world and other possible precursor systems; the early evolution of life as revealed by biochemical pathways, molecular phylogeny, Precambrian sediments and fossils, and the problem of the origin of the genetic code. Related to this central core, Astrobiology/Exobiology refers to the topic of the origin and evolution of life in a cosmic context, and includes planetary atmospheres; interstellar chemistry; the organic chemistry of comets, meteorites, asteroids and other small bodies; life detection and related areas. Experimental papers, theoretical articles and authoritative literature reviews are all appropriate forms.

### MANUSCRIPT SUBMISSION

Kluwer Academic Publishers request prefer the submission of manuscripts and figures in electronic form in addition to a hard-copy printout. The preferred storage medium for your electronic manuscript is a 3½ inch diskette. Please label your diskette properly, giving exact details on the name(s) of the file(s), the operating system and software used. Always save your electronic manuscript in the word processor format that you use; conversions to other formats and versions tend to be imperfect. In general, use as few formatting codes as possible. For safety's sake, you should always retain a backup copy of your file(s). **After acceptance**, please make absolutely sure that you send the latest (i.e., revised) version of your manuscript, both as hard-copy printout and on diskette (submission in electronic form of the final version of your article is compulsory).

*Origins of Life and Evolution of the Biosphere* prefers articles submitted in word processing systems such as Microsoft Word or Corel Word Perfect running under Windows. Other word processing systems and operating systems are also acceptable, but in such cases, reviewing will be carried out with hard copies only.

For final, accepted papers only, Kluwer Academic Publishers have developed a Kluwer LaTeX class file, which can be downloaded from: [www.wkap.nl/authors/jrn1stylefiles/](http://www.wkap.nl/authors/jrn1stylefiles/). Use of this class file is highly recommended. Do not use versions downloaded from other sites. Technical support is available at: [texhelp@wkap.nl](mailto:texhelp@wkap.nl). If you are not familiar with TeX/LaTeX, the class file will be of no

*Origins of Life and Evolution of the Biosphere* **34**: 271–275, 2004.  
© 2004 Kluwer Academic Publishers. Printed in the Netherlands.

use to you. In that case, use a common word processor format.

For the purpose of refereeing, papers should be submitted to: Professor Alan W. Schwarz, Laboratory for Evolutionary Biology, Faculty of Science, University of Nijmegen, P.O. Box 9010, 6500 GL Nijmegen (courier address: Room A2055, Toernooiveld 1, 6525 ED), The Netherlands (alan@sci.kun.nl).

If possible, submissions should be in electronic form, together with four hard copies of the manuscript, to be sent by conventional mail or courier. The electronic file may be sent as an email attachment, or submitted on disk, together with the hard copies. Authors are also encouraged to submit the names (together with conventional and email addresses) of three to four potential reviewers expert in the field covered by the paper. Use double spacing ... etc.

## MANUSCRIPT PRESENTATION

The journal's language is English. British English or American English spelling and terminology may be used, but either one should be followed consistently throughout the article. Manuscripts should be printed or typewritten on A4 or US Letter bond paper, one side only, leaving adequate margins on all sides to allow reviewers' remarks. Please double-space all material, including notes and references. Quotations of more than 40 words should be set off clearly, either by indenting the left-hand margin or by using a smaller typeface. Use double quotation marks for direct quotations and single quotation marks for quotations within quotations and for words or phrases used in a special sense.

Number the pages consecutively with the first page containing:

- **running head (shortened title)**
- **article type (if relevant)**
- **title**
- **author(s)**
- **affiliation(s)**
- **full address for correspondence, including telephone and fax number and e-mail address**

### Abstract

Please provide a short abstract of 100 to 250 words. The abstract should not contain any undefined abbreviations or unspecified references.

### Key Words

Please provide 5 to 10 key words or short phrases in alphabetical order.

### Formulas

Subscripts and superscripts should be set off clearly. Use a full stop for decimals, and reserve crosses for multiplication. The sign for 'about equal to' is  $\approx$ ; 'proportional to' is indicated by a tilde or a colon. Vectors are printed in bold face (indicated by wavy underlining in the manuscript). Distinguish clearly between the letter O and the zero symbol, the letter l and the number one, kappa and k, mu and u, nu and v, eta and n, etc.

### Units

The metric system is to be used, and the cgs or mks system. Abbreviate units only when preceded by a numeral, and note that only the singular form is used and is not followed by a full stop.

### Figures and Tables

*Submission of electronic figures*

In addition to hard-copy printouts of figures, authors are requested to supply the electronic versions of figures in either Encapsulated PostScript (EPS) or TIFF format. Many other formats, e.g., Microsoft Postscript, PiCT (Macintosh) and WMF (Windows), cannot be used and the hard copy will be scanned instead.

Figures should be saved in separate files *without* their captions, which should be included with the text of the article. Files should be named according to DOS conventions, e.g., 'figure1.eps'. For vector graphics, EPS is the preferred format. Lines should not be thinner than 0.25pts and in-fill patterns and screens should have a density of at least 10%. Font-related problems can be avoided by using standard fonts such as Times Roman and Helvetica. For bitmapped graphics, TIFF is the preferred format but EPS is also acceptable. The following resolutions are optimal: black-and-white line figures – 600-1200 dpi; line figures with some grey or coloured lines – 600 dpi; photographs – 300 dpi; screen dumps – leave as is. Higher resolutions will not improve output quality but will only increase file size, which may cause problems with printing; lower resolutions may compromise output quality. Please try to provide artwork that approximately fits within the typeset area of the journal. Especially screened originals, i.e. originals with grey areas, may suffer badly from reduction by more than 10–15%.

*Avoiding problems with EPS Graphics.*

Please always check whether the figures print correctly to a PostScript printer in a reasonable amount of time. If they do not, simplify your figures or use a different graphics program.

If EPS export does not produce acceptable output, try to create an EPS file with the printer driver (see below). This option is unavailable with the Microsoft driver for Windows NT, so if you run Windows NT, get the Adobe driver from the Adobe site ([www.adobe.com](http://www.adobe.com)).

If EPS export is not an option, e.g., because you rely on OLE and cannot create separate files for your graphics, it may help us if you simply provide a PostScript dump of the entire document.

*How to set up for EPS and Postscript dumps under Windows*

Create a printer entry specifically for this purpose: install the printer 'Apple Laserwriter Plus' and specify 'FILE': as printer port. Each time you send something to the 'printer' you will be asked for a filename. This file will be the EPS file or PostScript dump that we can use.

The EPS export option can be found under the PostScript tab. EPS export should be used only for single-page documents. For printing a document of several pages, select 'Optimise for portability' instead. The option 'Download header with each job' should be checked.

*Submission of hard-copy figures*

If no electronic versions of figures are available, submit only high-quality artwork that can be reproduced as is, i.e., without any part having to be redrawn or re-typeset. The letter size of any text in the figures must be large enough to allow for reduction. Photographs should be in black-and-white on glossy paper. If a figure contains colour, make absolutely clear whether it should be printed in black-and-white or in colour. Figures that are to be printed in black-and-white should not be submitted in colour. Authors will be charged for reproducing figures in colour.

Each figure and table should be numbered and mentioned in the text. The approximate position of figures and tables should be indicated in the margin of the manuscript. On the reverse side of each figure, the name of the (first) author and the figure number should be written in pencil; the top of the figure should be clearly indicated. Figures and tables should be placed at the end of the manuscript following the Reference section. Each figure and table should be accompanied by an explanatory legend. The figure legends should be grouped and placed on a separate page. Figures are not returned

to the author unless specifically requested.

In tables, footnotes are preferable to long explanatory material in either the heading or body of the table. Such explanatory footnotes, identified by superscript letters, should be placed immediately below the table.

### Notes

Avoid using footnotes if possible. However, if necessary, identify them by one asterisk, two asterisks, one dagger, etc.

### Cross-Referencing

In the text, a reference identified by means of an author's name should be followed by the date of the reference in parentheses. When there are more than two authors, only the first author's name should be mentioned, followed by *et al.* In the event that an author cited has had two or more works published during the same year, the reference, both in the text and in the reference list, should be identified by a lower case letter like 'a' and 'b' after the date to distinguish the works.

#### Examples:

Winograd (1986, p. 204)

(Winograd, 1986a, b)

(Winograd, 1986; Flores *et al.*, 1988)

(Bullen and Bennett, 1990)

### Acknowledgements

Acknowledgements of people, grants, funds, etc. should be placed in a separate section before the References.

### References

References to books, journal articles, articles in collections and conference or workshop proceedings, and technical reports should be listed at the end of the article in alphabetical order. Articles in preparation or articles submitted for publication, unpublished observations, personal communications, etc. should not be included in the reference list but should only be mentioned in the article text (e.g., T. Moore, personal communication).

References to books should include the author's name; year of publication; title; page numbers where appropriate; publisher; place of publication, in the order given in the example below.

Oparin, A. I.: 1938, *The Origin of Life*, Macmillan, New York, p. 201.

References to articles in an edited collection should include the author's name; year of publication; title of the article; editor's name; title of collection; first and last page numbers; publisher; place of publication in the order given in the example below.

Wald, G.: 1962, Life in the Second and Third Periods; or Why Phosphorus and Sulfur for High-Energy Bonds? in Kasha, M. and Pullman, B. (eds), *Horizons in Biochemistry*, Academic Press, New York and London, pp. 127–142.

References to articles in periodicals should include the author's name; year of publication; title of the article; abbreviated title of periodical; volume number (issue number where appropriate); first and last page numbers, in the order given in the example below.

Crick, F.H.C.: 1966, Codon-Anticodon Pairing: The Wobble Hypothesis, *J. Mol. Biol.* **19**, 548–555.

**PROOFS**

Proofs will be sent to the corresponding author. One corrected proof, together with the original edited manuscript, should be returned to the Publisher within three days of receipt by mail (airmail overseas).

**OFFPRINTS**

25 offprints of each article will be provided free of charge. Additional offprints can be ordered by means of an offprint order form supplied with the proofs.

**PAGE CHARGES AND COLOUR FIGURES**

No page charges are levied on authors or their institutions. Colour figures are published at the author's expense only.

**COPYRIGHT**

Authors will be asked, upon acceptance of an article, to transfer copyright of the article to the Publisher. This will ensure the widest possible dissemination of information under copyright laws.

**PERMISSIONS**

It is the responsibility of the author to obtain written permission for a quotation from unpublished material, or for all quotations in excess of 250 words in one extract or 500 words in total from any work still in copyright, and for the reprinting of figures, tables or poems from unpublished or copyrighted material.
