This week in therapeutics

Indication	Target/marker/pathway	Summary	Licensing status	Publication and contact information
Infectious disease				
Influenza	Influenza A virus nucleoprotein (NP)	<p>Mouse studies suggest an NP-targeting triazole analog of nucleozin could help treat influenza A infection. In mice, the NP-targeting compound reduced influenza-associated weight loss and mortality compared with vehicle. Next steps could include optimizing the lead NP-targeting analog. Nucleozin is an off-the-shelf chemical.</p> <p>SciBX 4(38); doi:10.1038/scibx.2011.1069 Published online Sept. 29, 2011</p>	Patent and licensing status undisclosed	<p>Gerritz, S.W. <i>et al. Proc.
