

Long-lived photoinduced charge separation in new Ru(bipyridine)₃²⁺-phenothiazine dyads

Gopalakrishnan Ajayakumar and Karical R. Gopidas

Photochem. Photobiol. Sci., 2008, 7, 826–833 (DOI: 10.1039/b717879d). *Amendment published 1st August 2008*

The *x* axis of the published Fig. 4 is labelled wrongly as 'Wavelength, nm'. It should be 'Time, ns'. The *y* axis is labelled wrongly as 'Counts × 10³'. It should be 'Counts × 10⁻³'. The correct version of Fig. 4 is shown below:

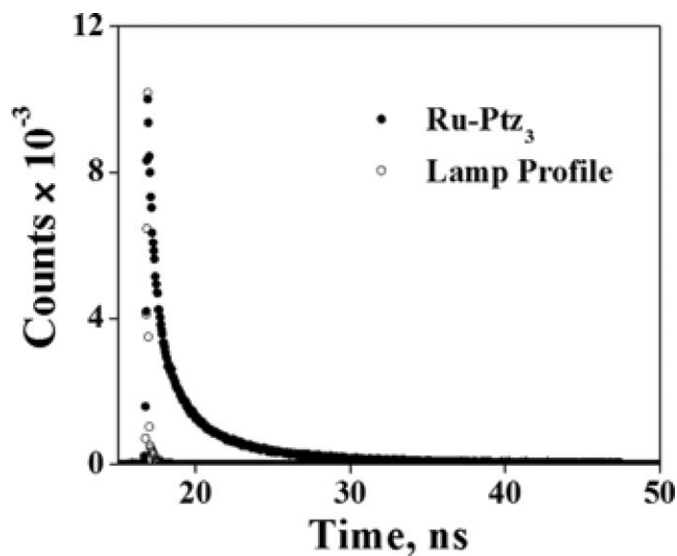

Fig. 4 Emission decay profile of Ru-Ptz₃ in ACN. Excitation was at 401 nm and emission was monitored at 630 nm. The lamp profile is also shown.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
