**Contact:** Science and Engineering Research Board

The Science and Engineering Research Board (SERB) is a statutory body established through an Act of Parliament. Supporting basic research in emerging areas of science and engineering are the primary and distinctive mandate of the Board. The Board structure, with both financial and administrative powers vested in the Board, enables quicker decisions on research issues, greatly improving thereby responsiveness to the genuine needs of the research scientists and the S&T system.

### J C Bose National Fellowship

**Subjects:** 1. Should be an active scientist with a record of outstanding performance apparent from the award of SS Bhatnagar prize and/or fellowship of science academies (including engineering, agriculture and medicine). 2. The scientist should be in service at the time of nomination to this fellowship. 3. The nominee should be an Indian national working in institutions/universities in India.

**Purpose:** The JC Bose fellowship is awarded to active scientists in recognition for their outstanding performance. The fellowship is scientist-specific and very selective.

### National Post Doctoral Fellowship (N-PDF)

**Purpose:** The SERB-National Post Doctoral Fellowship (N-PDF) is aimed to identify motivated young researchers and provide them support for doing research in frontier areas of science and engineering. The fellows will work under a mentor, and it is hoped that this training will provide them a platform to develop as an independent researcher

**Eligibility:** 1. The applicant should be an Indian citizen. 2. The applicant must have obtained PhD/M.D/M.S degree from a recognized University. Those who have submitted their PhD/M.D/M.S thesis and are awaiting award of the degree are also eligible to apply. However, such candidates, if selected, will be offered lower fellowship amount till they qualify the eligible degree. 3. The upper age limit for the fellowship is 35 years at the time of the submission of application, age will be calculated by taking the date of closure of the respective call. Age relaxation of 5 (five) years will be given to candidates belonging to SC/ST/OBC/Physically Challenged & Women candidates. 4. NPfD can be availed only once by a candidate in his/her career. 5. Mentor must hold a regular academic/research position in a recognized institution in India. Should hold PhD degree in Science or Engineering. 6. A mentor shall not have more than two SERB NPfD fellows at any given time. 7. Applicants of NPfD, SRG and EMR can submit their proposal only once in a calendar year in any of these schemes.

**Type:** Fellowship

**Value:** Fellowship: ₹55,000 per month (consolidated) and ₹35,000 per month for candidates who have submitted the thesis but degree not awarded. Research Grant: ₹200,000 per annum. Overheads: ₹100,000 per annum

**Length of Study:** Initially for a period of 2 years. In exceptional cases, depending on the progress of research, the fellowship can be extended for 1 more year. There is no provision to extend the tenure beyond 3 years

**Country of Study:** Hungary

**Application Procedure:** The application form along with a research proposal highlighting the objectives of the research work to be undertaken should be submitted online through the website [www.serbonline.in](http://www.serbonline.in)

**Additional Information:** The call for applications for SERB-N PDF will be notified twice a year through the websites [www.serbonline.in](http://www.serbonline.in) and [www.serb.gov.in](http://www.serb.gov.in). ### Ramanujan Fellowship

**Subjects:** Researchers scientists/engineers

**Purpose:** The scheme provides support to active researchers/scientists/engineers who want to return to India from abroad and contribute their work for the country.

**Eligibility:** 1. The fellowship is open to brilliant Indianscientists and engineers working abroad and are below the age of 40 years. 2. The nominee should possess

a higher degree or equivalent, such as PhD in Science/ Engineering, Masters in Engineering or Technology/ MD in Medicine, etc. and have adequate professional experience.

3. These Fellowships are very selective and only those who have a proven/ outstanding track-record as evident from their research publications and recognition's would be eligible.

4. In case of selection of the candidate for regular position in the university/institute, the candidate will not be eligible for receiving grant under Ramanujan Fellowship 5. The fellowship is only for those scientists who are not holding any permanent/ tenure-track/ contractual position in any Indian Institute/ University. 6. The Nominee should be working abroad at the time of nomination.

**Level of Study:** Postgraduate

**Type:** fellowship

**Value:** receive a research grant of ₹7,00,000 per annum and ₹60,000/- per annum as overhead charges

**Length of Study:** 5 years

**Frequency:** Annual

**Application Procedure:** Nominee need to register in SERB online portal, [www.serbonline.in](http://www.serbonline.in)

### S.N Bose Scholar Program

**Purpose:** S.N Bose Scholar Program is organized by the Science and Engineering Board (SERB), Department of science and technology (DST), Govt. of India, Indo-US Technology Forum and Win Step Forward. The scholarship envisages providing a world-class research platform in top US universities. It also aims at making Indo-US long-term collaboration in the field of research

**Eligibility:** 1. Students pursuing a Bachelor's or master's degree program from a recognized institution of India can apply for this scheme. 2. The disciplines of pursuing UG and PG degree are Atmospheric and Earth Sciences, Chemical Sciences, Engineering Sciences, Mathematical and Computational Sciences, and Physical Sciences. 3. Candidates who are studying PhD cannot apply

**Level of Study:** Postdoctorate

**Type:** Scholarship

**Length of Study:** 1 year

**Frequency:** Annual

### Industrial CASE Studentships

**Purpose:** Provides support for PhD students to work in collaboration with a non-academic partner on projects that aim to apply technologies or techniques developed within the programme into other areas

**Eligibility:** Organisations eligible to receive STFC grant funding

**Level of Study:** Postgraduate

**Type:** Studentship

**Value:** Stipend, fees, research training and fieldwork travel

**Length of Study:** 3.5 years

**Frequency:** Annual

**Country of Study:** United Kingdom

**Application Procedure:** Call opens in August. Applications must be submitted by the academic partner through the Je-S system. Proposals may be led by either the academic supervisor at an eligible United Kingdom University or research institute or supervisor/supervisors at the non-academic partner organisation, but the application process must be completed by the academic partner, who will then be the recipient of the award

**Closing Date:** October

**Funding:** Commercial

### Industrial CASE-Plus Studentship

**Purpose:** Provides support for PhD students to work in collaboration with a non-academic partner on projects that aim to

apply technologies or techniques developed within the programme into other areas. The student would spend a further year working full time on the premises of the non-academic partner as an employee

**Eligibility:** Organisations eligible to receive STFC grant funding

**Level of Study:** Postgraduate

**Type:** Studentship

**Value:** Stipend, fees, research training and fieldwork travel

**Length of Study:** 3.5 years

**Frequency:** Annual

**Study Establishment:** Science and Technology Facilities Council

**Country of Study:** United Kingdom

**Application Procedure:** The call opens May. Proposals may be submitted up to the closing date of July for awards to start in October. Proposals should be submitted by a supervisor from a Research Organization eligible to be the academic partner through the Je-S system

### Science Foundation Ireland

Wilton Park House, Wilton Place, Dublin 2, Ireland.

**Tel:** (353) 1 607 3200

**Email:** [info@sfi.ie](mailto:info@sfi.ie)

**Website:** [www.sfi.ie](http://www.sfi.ie)

**Contact:** Professor Mark W. J. Ferguson, Director

Science Foundation Ireland funds oriented basic and applied research in the areas of science, technology, engineering and mathematics (STEM), which promotes and assists the development and competitiveness of industry, enterprise and employment in Ireland. SFI will build and strengthen

scientific and engineering research and its infrastructure in the areas of greatest strategic value to Ireland's long-term competitiveness and development.

### **President of Ireland Young Research Award (PIYRA)**

**Purpose:** The purpose of the PIYRA programme is to recruit and retain outstanding early career investigators with leadership potential. Its aim is to enable those at an earlier career stage who already hold permanent academic positions to advance their careers and build up their research teams and activities; to allow researchers in temporary positions to advance their careers and provide them with enhanced opportunities to move into a permanent academic position; to enable the award holder, together with his/her team, to carry out their work in Ireland's public research bodies; to offer funding opportunities that help third-level institutions attract and develop researchers and their careers; to allow earlier-career investigators of all nationalities to enhance their experience in Irish HEIs and to allow those employed outside of Ireland to return to work in an Irish HEI

**Eligibility:** The lead applicant must have completed a minimum of 36 months of active postdoctoral research. The lead applicant must have been awarded a PhD or MD within the last 8 years, in the normal case, or up to a maximum of 12 and a half years for applicants who have taken documented eligible leave, as described below. The lead applicant has an exceptional record of internationally recognized independent research accomplishments for their career stage. The lead applicant must be an individual who will be recognized by the research body upon receipt of the SFI grant as an independent investigator who will have an independent office and research space at the host research body for which he/she will be fully responsible for at least the duration of the SFI grant

**Level of Study:** Research

**Type:** Grant

**Value:** Up to €1,000,000 of total value (inclusive of the host institution contribution) in direct costs

**Length of Study:** Up to 5 years

**Frequency:** Annual

**Study Establishment:** Host Research Bodies must be situated in the Republic of Ireland. Research Bodies will include Universities, Institutes of Technology and independent not-for-profit public research organizations that receive a significant share of their total funding from public sources

**Country of Study:** Ireland

**Application Procedure:** Applicants are invited to submit the following documentation: expression of Interest and if invited to do so after the Expression of Interest evaluation stage; full proposal. Application must be submitted via an eligible

research body. Application must be submitted online via SESAME

**Closing Date:** December

**Funding:** Government

### **Science Foundation Ireland Career Development Award (CDA)**

**Purpose:** The SFI Career Development Award (CDA) aims to support early- and mid-career researchers who already hold a salaried, independent research post and who are looking to expand their research activities. Its aims is to support excellent scientific research that has potential economic and societal impact; to enable those at an earlier career stage who already hold permanent academic positions to advance their careers and build up their research teams and activities; to allow researchers in temporary positions to advance their careers and provide them with enhanced opportunities to move into a permanent academic position; to provide the support and infrastructure to carry out novel research in areas that underpin SFI's legal remit; to enable the award holder, together with his/her team, to carry out their work in Ireland's public research bodies, including Universities and Institutes of Technology; to offer funding opportunities that help third-level institutions attract and develop researchers and their careers; to allow earlier-career investigators of all nationalities to enhance their experience in Irish HEIs

**Eligibility:** The applicant will be a researcher with 3–15 years of relevant experience beyond the award of their doctoral degree, who at the time of application will be either in a permanent, full-time academic position (either within the institution at which they wish to base their CDA-funded research or another elsewhere in Ireland or overseas), or employed on a temporary (fixed-term) contract where it is evident that the role being carried out is an independent research position (i.e., Postdoctoral Research Associates (or equivalent) or Research Fellows working under the guidance of a supervisor and who have never held an independent position are not eligible to apply to the CDA Programme)

**Level of Study:** Research

**Type:** Award

**Value:** Between €300,000 and €500,000 direct costs

**Length of Study:** 4 years

**Frequency:** Every 2 years

**Study Establishment:** Host Research Bodies must be situated in the Republic of Ireland. Research Bodies will include Universities, Institutes of Technology and independent not-for-profit public research organizations that receive a significant share of their total funding from public sources

**Country of Study:** Ireland

**Application Procedure:** Application must be submitted via an eligible research body. Application must be submitted online via SESAME ([www.sfi.ie/funding/award-management-system](http://www.sfi.ie/funding/award-management-system))

## Science Foundation Ireland Investigator Programme

**Purpose:** To fund scientific research projects of excellence in focused areas. To build capacity, expertise and relationships so as to enable researchers to compete in future SFI Research Centre Programmes or in other funding programmes such as ERC and Horizon 2020. To encourage researchers to build capacity, expertise, collaborations and relationships in areas of strategic economic importance through themed calls. To facilitate partnerships with other agencies. To support collaborations and partnerships between academia and industry

**Eligibility:** The lead applicant and any co-applicant(s) must hold a PhD/MD or equivalent for at least 5 years by the proposal deadline. The lead applicant and any co-applicant(s) are required to have demonstrated that they are each senior author on at least 10 international peer reviewed articles. The lead applicant and any co-applicant(s) are required to have demonstrated research independence through securing at least one independent research grant as a lead investigator or as co-investigator

**Level of Study:** Research

**Type:** Grant

**Value:** €400,000–2,500,000 per year

**Length of Study:** 3–5 years

**Frequency:** Annual

**Study Establishment:** Host Research Bodies must be situated in the Republic of Ireland. Research Bodies will include Universities, Institutes of Technology and independent not-for-profit public research organizations that receive a significant share of their total funding from public sources

**Purpose:** The SIRG programme supports excellent postdoctoral researchers who wish to take steps towards a fully independent research career. Aims: to support excellent scientific research that has potential economic and societal impact. To enable those at an early career stage to establish themselves as independent researchers; to provide the support and infrastructure to carry out novel research in areas that underpin SFI's legal remit; to gain important experience towards a full-time academic position, including the supervision of the postgraduate student supported by the award; to enable the award holder, together with his/her postgraduate student, to carry out their work in Ireland's public research bodies, including Universities and Institutes of technology; to offer funding opportunities that help third-level institutions attract and develop researchers and their careers; to allow early-career investigators of all nationalities to enhance their experience in Irish HEIs; to allow early-career investigators who have been employed outside of Ireland to return to work in an Irish HEI

**Eligibility:** The applicant will be a researcher with between 3 and 8 years of relevant experience beyond the award of their doctoral, who is currently employed as a Postdoctoral Research Associate (or equivalent) or a Research Fellow under the guidance of a named supervisor, and who has never previously held an independent research position of any kind where they were primarily responsible for a research team and its financial support. Allowances will be made for documented leave, including maternity leave, paternity leave, parental leave, military service, sick/disability leave and carer's leave

**Level of Study:** Research

**Type:** Grant

**Value:** Up to €400,000 direct costs

**Length of Study:** 4 years

**Study Establishment:** Host Research Bodies must be situated in the Republic of Ireland. Research Bodies will include Universities, Institutes of Technology and independent not-for-profit public research organizations that receive a significant share of their total funding from public sources

**Country of Study:** Ireland

**Application Procedure:** Application must be submitted via an eligible research body. Application must be submitted online via SESAME

The Smithsonian Tropical Research Institution (STRI) in Panama is a bureau of the Smithsonian Institution based outside of the United States and it is dedicated to understanding biological diversity. STRI's facilities provide a unique opportunity for long-term ecological studies in the tropics, and are used extensively by some 900 visiting scientists from academic and research institutions in the United States and around the world every year. STRI aims to offer research facilities that allow staff scientists, fellows, and visiting scientists to achieve their research objectives. STRI's Center for Tropical Forest Science uses large, fully enumerated forest plots to monitor tree demography in 14 countries located in

Africa, Asia and the Americas. More than 3,000,000 individual trees representing 6,000 species are being studied.

## Society for Academic Emergency Medicine Foundation

### Education Research Grant

**Subjects:** Emergency medicine

**Purpose:** The SAEMF Education Research Grant strives to foster innovation in teaching, education, and educational research in emergency medicine for faculty-, fellow-, resident- and medical student-level learners. The mission of the grant is to develop the academic potential of the selected fellow by providing support for a dedicated two-year training period, including pursuit and preferably completion of an advanced degree in education.

**Eligibility:** An applicant for the Education Research Grant must: Be a member of SAEM in good standing at application deadline and during the entire award period. Be board eligible or certified by the American Board of Emergency Medicine or American Board of Osteopathic Emergency Medicine and practicing in an emergency care setting. Senior/final year residents (3rd or 4th year, as applicable to the applicant's residency program) in good standing to graduate from an ACGME accredited emergency medicine residency program may also apply but must complete their residency program before the start of the award period. Not have completed more than one year of an education fellowship at the start of the award period. Not have received an Education Research Grant (formerly Education Fellowship grant) previously. Express and, if possible, provide evidence of a commitment to leadership in emergency medicine education in his/her current or prior work, or show potential for serving as a future leader in emergency medicine education. Demonstrate a sustained interest in and commitment to emergency medicine education and an education career. This demonstrated commitment may include previous participation in educational activities related to emergency medicine or another field, peer-reviewed publications, current or previous educational research, presentations of educational scholarly activity at scientific meetings, and engagement in local,

regional, national and international activities focused on research and emergency medicine-focused education. Applicants will be judged and scored according to their expressed and demonstrated commitment to these areas. Greater consideration and potentially higher scores will be given to applicants who can demonstrate this commitment. Demonstrate evidence of involvement in SAEM activities and functions. Demonstrated involvement includes number of years as a member of SAEM and participation in SAEM activities and functions (e.g., SAEM presentations and committee membership). Applicants will be judged and scored according to their expressed and demonstrated commitment to SAEM. Greater consideration and potentially higher scores will be given to applicants who can demonstrate this commitment.

**Type:** Grant

**Value:** Up to US\$50,000 per year for two years

**Length of Study:** Two years

**Frequency:** Annual

**Country of Study:** Any country

**Closing Date:** 1 August

**Additional Information:** [www.saem.org/saem-foundation/grants/funding-opportunities/what-we-fund/education-fellowship-grant](http://www.saem.org/saem-foundation/grants/funding-opportunities/what-we-fund/education-fellowship-grant)

### Research Training Grant

**Subjects:** Emergency medicine

**Purpose:** The SAEM Foundation, in partnership with SAEM, provides grants to national and international universities and medical schools to help fund innovative research and education initiatives in the field of emergency medicine. The SAEMF Research Training Grant is intended to provide funding to support the development of a scientist in emergency medicine.

**Eligibility:** Applicants should: Be a member of SAEM in good standing at application deadline and during the entire award period. Have an advanced/doctoral or terminal educational degree (e.g., MD, DO, PhD, PharmD, DSc or equivalent). Hold a university appointment (e.g., faculty, fellow, or similar) in or be actively involved (e.g., have an adjunct appointment) with a department or division of emergency medicine or pediatric emergency medicine at the start of the Research Training Grant award period. Emergency medicine residents in their final year of residency may apply for the Research Training Grant, subject to the same stipulation of holding a university appointment at the start of the Research Training Grant award period. The applicant may work as a clinician at an institution other than the host institution or the institution at which the project will be conducted. Not have previously received a SAEMF Research Training Grant, an Emergency Medicine Foundation (EMF) Research

Fellowship grant or other EMF grant with similar purpose as the SAEMF Research Training Grant, a federally funded individual career development award (K-series or VA CDA), or a similar research training grant from another entity, prior to the start of the Research Training Grant period. If an applicant has received funding for an institutional training grant (K12, KL2 or similar), he/she should provide a detailed description of the currently funded project and any similarities or overlap with the SAEMF application.

**Type:** Grant

**Value:** The Research Training Grant will provide a total of up to US\$150,000 per year for two years, contingent on the availability of funds from the SAEMF. The SAEMF Research Training Grant funds only may be used for the applicant's salary. Fringe benefits are permissible in addition to salary, but the total of salary and fringe benefits may not exceed US\$150,000 per year for two years. No additional costs, such as project costs, tuition, travel, and indirect costs, are supported by SAEMF; any other costs are the responsibility of the fellow's host institution or another group specified in the application.

**Length of Study:** Two years

**Frequency:** Annual

**Country of Study:** Any country

### St. Baldricks Foundations

In the 1950s, almost all kids diagnosed with cancer died. Because of research, today about 90% of kids with the most common type of cancer will live. But for many other types, progress has been limited, and for some kids there is still little hope for a cure.

**Tel:** (1) 626 792 8247

**Website:** [www.stbaldricks.org](http://www.stbaldricks.org)

**Contact:** 1333 South Mayflower Avenue, Suite 400, Monrovia, CA 91016, United States of America.

### Research Grants

**Purpose:** The St. Baldrick's Foundation is a volunteer and donor powered charity committed to supporting the most promising research to find cures for childhood cancers and give survivors long and healthy lives. It started with a friendly dare: would you shave your head to raise money for kids' cancer research? What happened next would change the world. This bold act of baldness has gained major momentum, since its start in 2000. Today, we have more than 1,000 head-shaving events taking place around the world at pubs, restaurants, schools, churches, parks, firehouses, military bases - you

name it. It is our constituents' way of changing the world, in a meaningful way. Since the Foundation's first grants as an independent charity in 2005, St. Baldrick's has invested more than US\$279 million in childhood cancer research grants worldwide. It's about collaboration. It's about powerful ideas, big and small. It's about never giving up until we have cures for all kids with cancers

**Eligibility:** Applicants need not be American citizens; however, they must work at an academic, medical, or research institution within the United States. 1. A program/institution is defined as an entity essentially operating under one management. Any questions or questionable situations will be reviewed by a subset of the Scientific Advisory Board of St. Baldrick's. Questions can be emailed to [Grants@Stbaldricks.org](mailto:Grants@Stbaldricks.org), please include a copy of the potential Scholar's biosketch. 2. Institutions that are actively involved in (sponsor, promote, or participate in) non-St. Baldrick's head-shaving fundraising events are not eligible to apply for St. Baldrick's funding. 3. St. Baldrick's funds may not be used for human embryonic stem cell research. 4. All awards will be payable to the Scholar's academic institution, non-profit research institution, or laboratory. 5. Applicants should hold a PhD, M.D., or D.O. degree in a field of research specialty by the date the award becomes effective. 6. Applicants must currently hold (for no longer than 7 years at the time the award begins), or will hold by start of the award, a title that is considered by the institution to be a fulltime, faculty position. Situations may occur where the institutions definition of "faculty" may differ from the Foundation's definition, this should be fully explained in the Scholar Applicant Checklist (required at LOI stage). 7. This is an early-career award. The Scholar award is intended to develop the independent pediatric cancer research careers of highly qualified investigators, not to support well established or senior investigators. 8. Scholars may receive funding from other sources to support their research. However, no other comparable or higher (monetary value) career development award may be held prior to or at the time the award begins. Scientific or budgetary overlap with other funded projects is not allowed. 9. In the event of comparable or higher (monetary value) career development funding after the LOI has been approved, the Scholar must give up the remainder of their St. Baldrick's award, unless otherwise approved by the St. Baldrick's Foundation. 10. Applicants holding or awarded R01s at the time of the LOI are not eligible to apply. Applicants cannot hold a NIH K-award at the time that they apply (institutional K12 funding is allowable). See "Conditions of Award" below regarding other awards received after the LOI is approved. 11. Applicants must have an appropriate Sponsor who provides supervision, facilities, and research support. If appropriate for the project, applicants may have more than one (1) Sponsor. 12. Research projects must have direct applicability and relevance to pediatric cancer. They may be

in any discipline of basic, clinical, translational, or epidemiological research.

**Level of Study:** Postgraduate

**Type:** Grant

**Value:** This award is granted for three years with an opportunity to apply for an additional two years of funding based upon the demonstration of significant accomplishment. (Years 4- 5, if funded, will be up to US\$115,000/year).

**Frequency:** Annual

**Country of Study:** US

**Application Procedure:** Category/Cycle specific LOI Instructions/Requirements are available in ProposalCENTRAL upon starting the LOI and on the St. Baldrick's website ([stbaldricks.org/for-researchers](http://stbaldricks.org/for-researchers)).

1. LOI, application, and required documents must be submitted by the Principal Investigator, in English, online through ProposalCENTRAL ([proposalcentral.altum.com](http://proposalcentral.altum.com)) before 5 p.m. EST on the deadline. 2. All application instructions and templates/requirements will be available in ProposalCENTRAL upon approval of an LOI. 3. Applicants can enable other users to access their proposal (e.g., department or grants administrators) in the full proposal section of ProposalCENTRAL. 4. It is the responsibility of the applicant to ensure and to verify that the application is received by the deadline date and that the application is complete and correct prior to submission. 5. Eligible current St. Baldrick's Scholars applying for extended funding will be contacted by the St. Baldrick's Foundation Grants Administration staff with instructions for applying. Applications will be submitted via ProposalCENTRAL and reviewed for progress. Grantees can email [Grants@StBaldricks.org](mailto:Grants@StBaldricks.org) with further questions about the optional funding. Applications are due before 5 p.m. EST on March 29, 2019. 1. St. Baldrick's Foundation funds biomedical research to better understand the causes of pediatric cancers and to advance its prevention, treatment, and cure. The main output of this research is new knowledge. To ensure this knowledge can be accessed, read, applied, and built upon in fulfillment of our goals, St. Baldrick's Foundation encourages researchers to share data with the research community in accordance with the NIH policy on data sharing and expects its grantees to publish their findings, including but not limited to publication in peer reviewed journals. Applicants will be asked about data sharing plans as part of the application. 2. All application evaluations are considered confidential and are available to scientific reviewers, the Foundation's Board of Directors, and the administrative personnel of the St. Baldrick's Foundation only. 3. Resubmissions: Applicants with resubmissions have the option to check a box in ProposalCENTRAL on the title page of the application stating that it is a resubmission. Resubmissions are not marked in the Letter of Intent stage. You may mention it is a resubmission in your LOI. Applicants with a resubmission are asked to address the reviewer comments in the appendix. Be sure that

the document addressing previous reviewer comments is listed in the table of contents for your appendix. Resubmission applicants will not have all three of the same reviewers. St. Baldrick's does ask at least one of the previous reviewers to re-review the resubmission. Once marked as a resubmission in ProposalCENTRAL, new reviewers will have access to the past reviewer comments. Resubmissions are still required to go through limited submission decisions per the institution.

### St. Baldrick's International Scholars

**Purpose:** The St. Baldrick's Foundation is a volunteer and donor powered charity committed to supporting the most promising research to find cures for childhood cancers and give survivors long and healthy lives. It started with a friendly dare: would you shave your head to raise money for kids' cancer research? What happened next would change the world. This bold act of baldness has gained major momentum, since its start in 2000. Today, we have more than 1,000 head-shaving events taking place around the world at pubs, restaurants, schools, churches, parks, firehouses, military bases - you name it. It is our constituents' way of changing the world, in a meaningful way. Since the Foundation's first grants as an independent charity in 2005, St. Baldrick's has invested more than US\$279 million in childhood cancer research grants worldwide. It's about collaboration. It's about powerful ideas, big and small. It's about never giving up until we have cures for all kids with cancers

**Eligibility:** Applicants need not be American citizens; however, they must work at an academic, medical, or research institution within the United States. 1. A program/institution is defined as an entity essentially operating under one management. o Any questions or questionable situations will be reviewed by a subset of the Scientific Advisory Board of St. Baldrick's. Questions can be emailed to [Grants@Stbaldricks.org](mailto:Grants@Stbaldricks.org), please include a copy of the potential Scholar's biosketch. 2. Institutions that are actively involved in (sponsor, promote, or participate in) non-St. Baldrick's head-shaving fundraising events are not eligible to apply for St. Baldrick's funding. 3. St. Baldrick's funds may not be used for human embryonic stem cell research. 4. All awards will be payable to the Scholar's academic institution, non-profit research institution, or laboratory. 5. Applicants should hold a PhD, M.D., or D.O. degree in

a field of research specialty by the date the award becomes effective. 6. Applicants must currently hold (for no longer than 7 years at the time the award begins), or will hold by start of the award, a title that is considered by the institution to be a fulltime, faculty position. o Situations may occur where the institutions definition of "faculty" may differ from the Foundation's definition, this should be fully explained in the Scholar Applicant Checklist (required at LOI stage). 7. This is an early-career award. The Scholar award is intended to develop the independent pediatric cancer research careers of highly qualified investigators, not to support well established or senior investigators. 8. Scholars may receive funding from other sources to support their research. However, no other comparable or higher (monetary value) career development award may be held prior to or at the time the award begins. Scientific or budgetary overlap with other funded projects is not allowed. o In the event of comparable or higher (monetary value) career development funding after the LOI has been approved, the Scholar must give up the remainder of their St. Baldrick's award, unless otherwise approved by the St. Baldrick's Foundation. 10. Applicants holding or awarded R01s at the time of the LOI are not eligible to apply. Applicants cannot hold a NIH K-award at the time that they apply (institutional K12 funding is allowable). See "Conditions of Award" below regarding other awards received after the LOI is approved. 11. Applicants must have an appropriate Sponsor who provides supervision, facilities, and research support. If appropriate for the project, applicants may have more than one (1) Sponsor. 12. Research projects must have direct applicability and relevance to pediatric cancer. They may be in any discipline of basic, clinical, translational, or epidemiological research.

**Level of Study:** Postgraduate

**Type:** Grant

**Value:** This award is granted for three years with an opportunity to apply for an additional two years of funding based upon the demonstration of significant accomplishment. (Years 4- 5, if funded, will be up to US\$115,000/year).

**Frequency:** Annual

**Country of Study:** US

**Application Procedure:** Category/Cycle specific LOI Instructions/Requirements are available in ProposalCENTRAL upon starting the LOI and on the St. Baldrick's website ([stbaldricks.org/for-researchers](http://stbaldricks.org/for-researchers)). 1. LOI, application, and required documents must be submitted by the Principal Investigator, in English, online through ProposalCENTRAL ([proposalcentral.altum.com](http://proposalcentral.altum.com)) before 5 p.m. EST on the deadline. 2. All application instructions and templates/requirements will be available in ProposalCENTRAL upon approval of an LOI. 3. Applicants can enable other users to access their proposal (e.g., department or grants administrators) in the full proposal section of ProposalCENTRAL. 4. It is the responsibility of the applicant

to ensure and to verify that the application is received by the deadline date and that the application is complete and correct prior to submission. 5. Eligible current St. Baldrick's Scholars applying for extended funding will be contacted by the St. Baldrick's Foundation Grants Administration staff with instructions for applying. Applications will be submitted via ProposalCENTRAL and reviewed for progress. Grantees can email [Grants@StBaldricks.org](mailto:Grants@StBaldricks.org) with further questions about the optional funding. Applications are due before 5 p.m. EST on March 29, 2019. 1. St. Baldrick's Foundation funds biomedical research to better understand the causes of pediatric cancers and to advance its prevention, treatment, and cure. The main output of this research is new knowledge. To ensure this knowledge can be accessed, read, applied, and built upon in fulfillment of our goals, St. Baldrick's Foundation encourages researchers to share data with the research community in accordance with the NIH policy on data sharing and expects its grantees to publish their findings, including but not limited to publication in peer reviewed journals. Applicants will be asked about data sharing plans as part of the application. 2. All application evaluations are considered confidential and are available to scientific reviewers, the Foundation's Board of Directors, and the administrative personnel of the St. Baldrick's Foundation only. 3. Stanford University, located between San Francisco and San Jose in the heart of California's Silicon Valley, is one of the world's leading teaching and research universities. Since its opening in 1891, Stanford has been dedicated to finding solutions to big challenges and to preparing students for leadership in a complex world.

**School of Medicine Dean's Postdoctoral  
Fellowship**

**Purpose:** The School of Medicine Dean's Postdoctoral Fellowships encourage and support young investigators in the first two years of their postdoctoral (PhD or MD) research training at the School of Medicine and who are under the mentorship of faculty in the School of Medicine. With the goal to support current postdocs and to facilitate the recruitment of new scholars, support of a Dean's Fellowship is often used as "seed" money while outside funds are sought

**Eligibility:** 1. Applicants must be postdoctoral scholars at the School of Medicine at the time the award begins. If applicant is not a postdoc at the application deadline, additional documents must be submitted with application (see below). 2. Faculty sponsors must be appointed in the School of Medicine. Acting, consulting, and courtesy appointees are ineligible. 3. Awardees cannot be enrolled in a degree-granting program while funded. 4. Applicants in the first one or two years of postdoctoral research training are preferred. 5. Foreign fellows must have visas that allow stipend support (typically a J-1 & F-1 OPT). H1-B and TN visa holders are ineligible. Citizenship is not a selection factor. 6. This is a one-year fellowship and applications for a second year of funding will not be reviewed.

**Level of Study:** Postgraduate**Type:** Fellowship**Value:** Stipend is US\$31,350**Frequency:** Annual**Country of Study:** Any country

**Application Procedure:** Complete applications must be submitted online by the deadline. **Stanford Postdoctoral Recruitment Initiative in Sciences and Medicine (PRISM)**

**Purpose:** We invite all graduate students, and especially those from backgrounds underrepresented in the sciences, to apply for the Stanford Postdoctoral Recruitment Initiative in Sciences and Medicine (PRISM) postdoc interview opportunity. Underrepresented groups include, but are not limited to: African Americans, Latinos, Native Americans, Pacific Islanders, those with disabilities or from disadvantaged backgrounds. Stanford PRISM enables students who might not typically consider a postdoc at Stanford the opportunity to see first-hand if Stanford would be a good match for them

**Eligibility:** 1. Eligible for NIH T-32 training grants, which are limited to US Citizens or Permanent Residents, by the time they will begin their postdoctoral appointment. 2. Currently at any institution in the US. Applications from students in Canada, Mexico, Puerto Rico, etc., may also be considered, pending funding availability. Travel funds are not available for those currently located overseas. 3. Intend to complete their PhD within 15 months of PRISM, though later graduation dates may be considered, at the discretion of the faculty or program.

## Sugar Research Australia - SRA

SRA invests in and manages a portfolio of research, development and adoption projects that drive productivity,

profitability and sustainability for the Australian sugarcane industry. An industry-owned company, we are funded by a statutory levy paid by growing and milling businesses. The SRA levy payers' stakeholder investment is also supported by the Commonwealth Government co-investment and grants from the Queensland Government and other bodies. We know and understand the issues our members and levy payers face. We tackle these issues to find research solutions and new and better ways of doing things on-farm and at the mill.

Sugar Research Australia invests in and manages a portfolio of research, development and adoption projects that drive productivity, profitability and sustainability for the Australian sugarcane industry.

### **Sugar Industry Postgraduate Research Scholarships (SPRS)**

**Purpose:** Sugar Research Australia (SRA) invests in and manages a portfolio of research, development and adoption (RD&A) projects that drive productivity, profitability and sustainability for the Australian sugarcane industry. SRA also invests significantly in industry capability with the ongoing future success of the sugar industry dependent upon improving the capability of existing industry employees. With respect to research funding and encouraging young scientists into our industry, SRA makes available a number of SPRS awards every year, tenable at Australian universities and institutions, for postgraduate research study. The purpose of these awards is to enable qualified graduates to undertake Research Doctorate or Research Masters study and to facilitate research and training in areas of value to the Australian sugarcane industry.

**Eligibility:** The purpose of the SPRS is to enable high calibre students to undertake a Masters or PhD research degree in disciplines relevant to the future of the Australian sugar industry. Scholarships are available for three years for PhD studies and two years for Research Masters studies and are awarded on the basis of academic excellence. Applicants should consult the SRA Strategic Plan document available on the SRA website and focus on inventive projects that address at least one of the following eight key focus areas of investment: 1. Optimally-adapted varieties, plant breeding and release 2. Soil health, nutrient management and environmental sustainability 3. Pest, disease and weed management 4. Farming systems and harvesting 5. Milling efficiency and

technology 6. Product diversification and value addition 7. Knowledge and technology transfer and adoption 8. Collaboration and capability development To be eligible for a full SPRS or a top-up scholarship, the candidate must be a citizen or permanent resident of Australia and must have acceptance at a recognised research institution. The principal supervisor for the postgraduate study program must provide evidence that the host organisation supports the project and the applicant's candidature for the relevant study program. Awards are tenable at Australian universities/institutions; however for applicants of proven ability who are undertaking a PhD, training at overseas institutions may be approved where benefits will return to the Australian sugar industry and where overseas supervision will confer additional benefit. Awards are conferred on the student based on merit, with the evaluation criteria set out within this document. Generic applications from prospective supervisors requesting support for postgraduate research projects without identifying a specific candidate will not be considered. The SPRS award offers supplementary or full scholarships, the number and value of which are at the discretion of SRA. For a higher probability of success, the applicant is encouraged to also apply for a Research Training Program (RTP) scholarship or equivalent through their host university. Preference will be given to applicants who receive an RTP or equivalent scholarship. Successful applicants not holding an RTP scholarship or any other base scholarship will be provided a tax-free stipend of AU\$32,000 per annum (exclusive of GST). Successful applicants with an RTP scholarship will be provided a tax free top-up set at a maximum of 75% of the RTP stipend rate which is determined by the Australian Government Department of Education and Training each year. All successful applicants will also be provided with an additional budget of AU\$10,000 (excluding GST) per year to support research project operating expenses.

**Level of Study:** postgraduate

**Type:** Scholarship

**Value:** AU\$32,000

**Frequency:** Annual

**Country of Study:** Australia

**Application Procedure:** The SRA SugarNet online submission system must be used for all SPRS applications. This can be accessed at [sugarnet.sugarresearch.com.au](http://sugarnet.sugarresearch.com.au). Applications will not be considered to be complete until the curriculum vitae (CV), certified copies of the academic record and academic transcript, letters of reference from at least two referees and proof of nationality or permanent residence visa are uploaded through SugarNet to accompany the application. The project title needs to be a concise statement of the aim of the proposed research project. The title, objectives and outcomes expected from the project may be published in the SRA Annual Report. Candidates are encouraged to consult their Principal Supervisor when completing this section of the online submission form. No additional information or

attachments (such as images, diagrams, flow-charts, tables etc.) should be included unless a prior arrangement has been made with SRA

**Tel:** (41) 31 308 2222

**Website:** [www.snf.ch](http://www.snf.ch)

**Contact:** Dr Benno G Frey, Office for Fellowship Programmes

The Swiss National Science Foundation (SNSF) supports scientific research at Swiss universities and other scientific institutions and awards fellowships to Swiss scientists or scientists living in Switzerland. The SNSF was established in 1952 as a private foundation entrusted with the promotion of basic non commercial research. While the SNSF supports research through grants given to established or promising researchers, it does not maintain its own research institutions. The main objectives of the SNSF are to support basic research in all areas of academic research and to support young scientists and researchers, with the intent of ensuring the continuing high quality of teaching and research in Swiss higher education. In addition to the general research funding, the SNSF is responsible for the National Research Programmes (NRP).

### Swiss National Science Foundation Fellowships for Prospective Researchers

**Purpose:** To promote holders of MA or PhD degrees, who have had at least one year's experience in active research after the completion of their degree

**Eligibility:** Open to promising young Scholars under the age of 33 who are Swiss nationals or permanent residents of Switzerland, hold an MA or PhD and can demonstrate at least one year's experience in active research. An exception to the age restriction (to a maximum of two years) can be made for candidates from clinical disciplines, or candidates who have interrupted their scientific careers due to family obligations. The main condition for such an exception is that the candidate has reached a high scientific level and will in the future pursue an active career in science and research. A high priority will be given to candidates who plan to return to Switzerland

**Level of Study:** Postdoctorate, Predoctorate

**Type:** A variable number of fellowships

**Value:** Varies

**Length of Study:** Varies
