Presents new data for the New labour productivity measures from the ABI, calculated using published ABI data, updating previous results for 1998 to 2000.

This article presents new current price labour productivity data calculated using published data from the Annual Business Inquiry (ABI). This is an update of previous work by Daffin and Lau (2002) where results for 1998 to 2000 were provided. The results in this article contain revised data for this period¹ and new data for 2001 to 2005. The rest of the article discusses the results, the quality of the estimates and also industry-specific data issues.
