In the above paper, an incorrect version of Table 2 was published. The correct version appears on the following page.

Table 2 Moderated hierarchical regression results for the cooperation-performance relations ($N=250$)^{a,b}

^aThe entries in the table are the standardized $\hat{\alpha}_s$ with standard errors in parentheses, where [†] $P < 0.10$; * $P < 0.05$; ** $P < 0.01$; *** $P < 0.001$.

^bThe mean centering technique was used in all models above to remove the multicollinearity between predictors and interaction terms that contain these predictors.
