Correction to: *Risk Management* (2012) 14, 93–108. doi:10.1057/rm.2011.7

A typographical error has been detected after the article was initially published.

Table 1 was missing a category section, the omission of which misrepresented the data and the findings that followed. We apologise that this was not noticed before first publication. Please see below for the corrected table:

Table 1: Unpacking vulnerability to crime

<i>Vulnerability to crime</i>			
<i>Pre-crime conditions</i>		<i>Post-crime conditions</i>	
<i>Opportunities</i>	<i>Inadequate controls</i>	<i>Lack of recovery</i>	<i>Lack of adaptation</i>
Weak financial situation of enterprise	Inadequate sector entrance checks	No financial back-ups	Lack of communication on crime risks
Lack of crime prevention measures	Lack of key positions checks	No redundancy/back-up in business systems	Lack of employee awareness
Inadequate legislation	Lack of business partnership checks	No contingency/continuity planning	No flexibility in enterprise structures
