Website: www.earthwatch.org/research
Contact: Gitte Venicx, Research Program Manager

Earthwatch Institute supports diverse research projects of high scientific merit worldwide that address critical environmental and social issues at local, national and international levels. Researchers are given both funding and field assistance from layperson volunteers. Volunteers are recruited by Earthwatch, who pay for the opportunity to assist them in the field.

Earthwatch Field Research Grants

Subjects: We support field-based research in terrestrial, marine, freshwater, and urban ecosystems

Purpose: To provide funding for field-based research projects that meaningfully involve non-specialist volunteers in data collection

Eligibility: All proposals must be submitted by the Principal Investigator (PI). All PIs must have a PhD and an affiliation with a university, government agency, or NGO

Level of Study: Doctorate, Postdoctorate, Postgraduate, Research

Type: Grant

Value: US\$20,000-80,000 annually

Length of Study: Successful proposals are funded for 3 years, subject to passing an annual performance review

Frequency: Annual

Study Establishment: Research sites

Country of Study: Any country

Application Procedure: Requests for proposals are distributed in the spring. Applicants must submit a pre-proposal for consideration. Please see the Earthwatch website (earthwatch.org) for more information

Closing Date: Please check the website

Funding: Private, Corporation, Foundation

Contributor: Volunteers' contributions

Additional Information: Any country - some exceptions see 'No Go' list on Earthwatch website. Applications are submitted online

Economic History Association (EHA)

EHA is based at the University of Wisconsin - see here: <http://eh.net/eha/grants-and-fellowships/>

Website: www.eh.net/eha

Contact: angela.vossmeier@cmc.edu

The Economic History Association (EHA) was founded in 1940. Its mission is to stimulate interest in the study of economic history, to encourage research in economic history and ideas, to co-operate with societies devoted to the study of agricultural, industrial, technological or business history, and to collaborate with economists, historians, statisticians, geographers and all other students of economic change.

Arthur H Cole Grants-in-Aid

Subjects: Economic history

Purpose: To support research

Eligibility: Applicants must have completed a PhD and be members of the EHA

Level of Study: Postdoctorate

Type: Grant

Value: Up to US\$5,000

Frequency: Annual

Country of Study: Any country

Application Procedure: The Committee on Research in Economic History awards Arthur H. Cole grants-in-aid to support research in economic history, regardless of time period or geographic area. Awards typically are in amounts up to \$5,000, although higher amounts may be awarded in exceptional cases. Applicants must be members of the Association and must hold the Ph.D. degree. Preference is given to recent Ph.D. recipients

Closing Date: 1 March

Funding: Private

Contributor: EHA members

Additional Information: Membership enquiries should be addressed to the office of the Executive Director or the website

For further information contact:

Postdoctoral Fellowship Program

Subjects: Individuals who have earned their doctoral degree within the last three years are invited to apply for a rewarding fellowship experience which combines working on cutting-edge ETS research projects and conducting independent research that is relevant to ETS's goals

Purpose: Provide research opportunities to individuals who hold a doctorate in the fields such as Applied Psychometrics, Artificial Intelligence Based Automated Scoring, Modeling of Response Processes and Response Times, Psychometric Issues in Adaptive Testing Designs, Statistical and Psychometric Foundations and Statistical and Psychometric Issues in Group-Scored Assessments

Eligibility: 1. Doctorate in a relevant discipline within the past three years. 2. Evidence of prior independent research

Level of Study: Postdoctorate

Type: Fellowship

Length of Study: Upto 2 years and it is renewable

Frequency: Annual

Country of Study: Any country

Application Procedure: Two applications have to be submitted from our end. Preliminary Application Complete the electronic preliminary application form. On the application form: 1. Indicate your research area of interest. 2. Enter your statement of interest. 3. Enter an abstract about the independent research you propose to conduct while at ETS. 4. Attach a copy of your curriculum vitae. 5. Attach a copy of your graduate transcripts (student copy is acceptable). Final Application If your preliminary application is approved, you will be invited to submit the following materials: 1. a detailed proposal (approximately five double-spaced pages) describing the research that will be carried out at ETS and how it relates to

current ETS research. 2. samples of published research. 3. names and email addresses of three individuals who are familiar with your work, and who are willing to complete a recommendation form that will be sent to them electronically

Closing Date: 1 February

Funding: Private

Endeavour Research Fellowship

Department of Education and Training International Group
International Mobility Branch Endeavour Scholarships and Fellowships, Canberra, ACT 2601 9880, Australia

Email: endeavour@education.gov.au

Contact: Endeavour Research Fellowship

The Endeavour Scholarships and Fellowships are the Australian Government's competitive, merit-based scholarships and fellowships providing opportunities for Australians to undertake study, research or professional development overseas and for overseas citizens to do the same in Australia.

Endeavour Research Fellowship for International Applicants

Subjects: Fellowships are awarded in any field of study

Purpose: The Endeavour Scholarships and Fellowships aim to build Australia's reputation for excellence in the provision of education and research, support the internationalisation of the Australian higher education and research sectors and offer high-achieving individuals from overseas and Australia opportunities to increase their productivity and expertise in their field

Eligibility: Be aged 18 years or over at the commencement of their program. Be a citizen and/or permanent resident of a participating country (section 8). Commence their proposed program after 1 January and no later than 30 November. Provide all relevant supporting documentation (section 9). Not currently hold or have completed, after 1 January, an Australian Government sponsored scholarship and/or fellowship (directly administered to recipients by the Australian Government). Not apply for a category in which they have already completed an Endeavour scholarship or fellowship

Value: All recipients will receive: travel allowance: \$3,000 (provision to pay up to \$4,500 under special circumstances); establishment allowance: \$2,000 (fellowships) or \$4,000 (scholarships); monthly stipend: \$3,000 (paid up to the maximum category duration on a pro-rata basis)*; health insurance for the full category duration (OSHC for international recipients); travel insurance (excluding during programme for

international recipients); Endeavour scholarship recipients will also receive tuition fees paid up to the maximum study/research duration on a pro-rata basis. Tuition includes student service and amenities fees

Study Establishment: Fellowships are awarded in any field of study

Country of Study: Australia

Application Procedure: Applications must be submitted using the Endeavour Online application system. Applicants are encouraged to commence their applications early and submit their application as early as possible during the application period due to the large volume of users on the system in the lead up to the closing date. Submitting early ensures that you will not have any last minute technical problems due to the large number of applications being submitted

Closing Date: Applications will close on 30 June

Additional Information: For more details please visit the website scholarship-positions.com/endeavour-research-fellowship-international-students-2014/2013/04/13/

Engineering and Physical Sciences Research Council (EPSRC)

Polaris House, North Star Avenue, Wiltshire SN2 1ET, Swindon, United Kingdom

The Engineering and Physical Sciences Research Council (EPSRC) promotes and supports high quality, basic, strategic and applied research and related postgraduate training in engineering and physical sciences. It aims to advance knowledge and technology by providing trained scientists and engineers, in order to meet the needs of users and beneficiaries, and thereby contribute to economic competitiveness and quality of life.

Daphne Jackson Fellowships

Subjects: Physical sciences, engineering and information technology

Purpose: To enable high-level scientists and engineers to return to their professions after a career break for family commitments

Eligibility: Promising engineers and scientists who have taken a career break for family commitments, who have

obtained at least a first degree and who are normally resident in the United Kingdom

Level of Study: Graduate, Postdoctorate, Research

Type: A variable number of fellowships

Value: Fixed to United Kingdom Research Council RA1A scale

Length of Study: 2 years (part-time possible)

Frequency: Dependent on funds available

Study Establishment: Universities or research institutions in the United Kingdom that are convenient for the candidate

Country of Study: United Kingdom

No. of awards offered: 69

Application Procedure: Applicants must complete an application form. Further information can be found on the website www.sst.ph.ic.ac.uk/trust

Closing Date: Applicants must write for details

Funding: Government, Commercial, Private

No. of awards offered last year: 6

No. of awards applicants last year: 69

Additional Information: Daphne Jackson Fellowships are sponsored by the Biotechnology and Biological Sciences Research Council (BBSRC), the Particle Physics and Astronomy Research Council (PPARC) and the Natural Environment Research Council (NERC), together with charitable foundations, learned societies, universities and industries

Engineering and Physical Sciences Research Council Standard Research Studentships

Subjects: Engineering and the physical sciences (physics, chemistry and mathematics), materials, and IT and computer science

Purpose: To enable training in the methods of research

Eligibility: Non European Union nationals must be settled in the United Kingdom without being subject under immigration law to any restriction for the period to which they remain. European Union nationals may apply, provided their qualifications are equivalent to a British Upper Second Class (Honours) Degree. Support will be fees only unless migrant worker status has been established

Level of Study: Postgraduate

Type: Studentship

Value: UK£8,265 for students in London. UK£6,620 for students elsewhere (1999–2000 rates). Values are reviewed annually. In addition, other allowances are payable under certain conditions. Approved tuition fees are paid directly to the institution

Length of Study: Maximum 3 years

Frequency: Annual

Study Establishment: Higher education institution

Country of Study: Other

Application Procedure: Applicants must be nominated by departments of higher education institutes. Applications on behalf of students should be directed to the relevant address. Full information can be found on the web pages or from academic institutions

Closing Date: 12 July

Funding: Government

No. of awards offered last year: 1450

Royal Society EPSRC BBSRC and Rolls Royce PLC Industry Fellowships

Subjects: Science and technology outside the fields of agriculture including horticulture, agricultural economics, agricultural engineering, and the more applied aspects of agricultural science, natural environment sciences which may be defined broadly as geology and geophysics including seismology and geomagnetism, meteorology, hydrology, oceanography, marine and freshwater biology, terrestrial ecology, medicine, food science, social science, and those aspects of psychology which are closely related to fundamental biology and to the engineering and biological aspects of ergonomics and cybernetics

Purpose: To enhance the communication on science and technology between those in industry and those in universities or similar institutions of higher education to the benefit of United Kingdom firms, higher education institutions and the individual scientist. The aim is to establish long-lasting personal and corporate linkages between the two sectors in the United Kingdom

Eligibility: Open to applicants of any nationality. Candidates should be at the mid-career level and have had significant achievement in their home organisations. Also a substantial career should be ahead of the candidate towards the end of the award, to build upon the contacts made during the fellowship. Candidates must hold a PhD or equivalent in their profession and a substantive post in a university or similar academic institution as a scientist, mathematician or engineer, or be employed as a scientist, mathematician or engineer in any industry, an industrial research organisation or a nationalised industry. Organisations partly or wholly supported by public funds may not act as the industrial partner for an award.

Preference will be given to candidates showing evidence of previous contact with or interest in the other sector of employment

Level of Study: Postdoctorate

Type: Fellowship

Value: Payment of salary but not employers' National Insurance and pension contributions

Length of Study: Up to 2 years full-time. A part-time equivalent is available

Country of Study: Other

Application Procedure: Applicants must complete an application form available from the website. Details are available from the Royal Society Research Appointments Department

Closing Date: December

Funding: Government, Commercial, Private

Additional Information: The scheme provides opportunities for academic scientists, mathematicians and engineers to work in an industrial environment and undertake a project at any stage from fundamental science to industrial innovation, and for industrial scientists, mathematicians and engineers to undertake research or course development work in an institution of higher education

The EMF is a registered charity established in 1999 (Charity no 1077002). EMF is committed to building a secure base for Britain's minority ethnic communities and voluntary sector. It is dedicated to addressing some of the worst cases of social exclusion that affect and disadvantage minority ethnic communities living in the United Kingdom.

Ethnic Minority Foundation Grants

Purpose: To provide long-term and short-term funding of minority ethnic voluntary and community organizations, and funding for other community needs such as education, health, women's and youth projects

Type: Grant

Funding: Foundation, Individuals

No. of awards offered last year: 17

Eugène Vinaver Memorial Trust

Barron Bequest

Subjects: Any field of Arthurian studies

Purpose: To support postgraduate research in Arthurian studies

Eligibility: Open to graduates of any university of the United Kingdom and Ireland

Type: Grant

Value: £1,250, payment towards postgraduate fees

Length of Study: One year. Candidates may apply for further years on a basis of parity with those applying for the first time

Frequency: Annual

Study Establishment: Any university in United Kingdom or Ireland

Country of Study: United Kingdom, Republic of Ireland

Application Procedure: For application details, applicants must contact Professor Taylor at the address below

Funding: Private

Contributor: The Eugène Vinaver Memorial Trust

For further information contact:

Professor JHM Taylor, Garth Head, Penruddock, Cumbria

European Association for the Study of Diabetes- ADA Transatlantic Fellowships

Subjects: Diabetes

Purpose: To encourage research into basic or clinical questions related to diabetes and its complications

Eligibility: Applicants should have completed their MD, PhD or equivalent within the previous 7 years and cannot be serving an internship or residency during the fellowship. European applicants must be EASD members and United States of America applicants should be ADA members

Level of Study: Research

Type: Fellowship

Value: US\$50,000

Length of Study: 1 year

Frequency: Annual

Country of Study: United States of America

Application Procedure: Applications must be made on the forms provided. Two copies of the application forms should be submitted

Closing Date: 1 February

Contributor: EASD-Lilly Research Fund

Additional Information: Successful applicants will be notified of the award by 1 April. Funding begins on 1 July

European Calcified Tissue Society/Servier Fellowship

Subjects: Pathophysiology of osteoporosis

Purpose: To encourage the research involving pathophysiology of osteoporosis, particularly the coupling and uncoupling processes between bone formation and bone resorption and all related matters

Eligibility: Open for ECTS members who qualified PhD/MD within the last 10 years. Applications to include details of a preclinical or clinical research project on the pathophysiology of osteoporosis, particularly the coupling and uncoupling processes between bone formation and bone resorption and all related matters

Level of Study: Research

Type: Fellowship

Value: €80,000

Length of Study: 2 years

Frequency: Every 2 years

Country of Study: Any country

No. of awards offered: 20

Application Procedure: Applicants should fill an application form. For further details log on to www.ectsoc.org

Closing Date: November

Funding: Commercial

Contributor: Servier

No. of awards offered last year: 1

No. of awards applicants last year: 20

European Committee for Treatment and Research in Multiple Sclerosis (ECTRIMS)

ECTRIMS Secretariat, Peter Merian-Strasse 80, Basel
CH-4002, Switzerland

Tel: (41) 61 686 7779
Fax: (41) 61 686 7788
Email: secretariat@ectrims.eu
Website: www.ectrims.eu

The committee works to facilitate communication, create synergies, and promote and enhance research and learning among professionals for the ultimate benefit of people affected by MS.

European Committee for Treatment and Research in Multiple Sclerosis-MAGNIMS Fellowship in Magnetic Resonance Imaging in MS

Subjects: Magnetic resonance studies

Purpose: ECTRIMS and the European MAGNIMS (Magnetic Resonance Imaging in MS) network jointly support a postdoctoral fellowship to foster the development of young researchers in magnetic resonance imaging studies in MS. The goal of this programme is to achieve transfer and broadening of knowledge regarding the application of magnetic resonance to MS research and to promote the researcher's integration into the international scientific community

Eligibility: Applicants should be under 40 years and affiliated to an academic department which can guarantee a continuation of his or her research

Type: Fellowship

Value: An annual stipend of up to €50,000

Length of Study: 1 year

Frequency: Annual

Country of Study: Any country

Application Procedure: Please check with the organization

Closing Date: 1 February

Additional Information: Details about all ECTRIMS Fellowship Programmes and application material can be obtained from the ECTRIMS website: www.ectrims.eu/fellowships or by writing to the ECTRIMS fellowship administrator: fellowship@ectrims.eu

European Crohn's and Colitis Organisation Fellowship

Subjects: ECCO Research Fellowships aim to enhance the opportunity for IBD Trainees to work in European centres

Purpose: The European Crohn's and Colitis Organisation (ECCO) offers Research Fellowships to encourage and support young individuals in their career and promote innovative scientific research in the area of Inflammatory Bowel Diseases (IBD) in Europe

Eligibility: 1. Not be older than 40 years or still in training at the time of application. 2. Submit an original research project using the ECCO Fellowships and Grants Online Submission Pages. Incomplete applications will not be evaluated. 3. Have a hosting laboratory and/or department outside one's own country of practice, which has accepted to host and guide the Fellow under the supervision of a designated host for the duration of the Fellowship. The hosting institution is responsible, together with the Fellow, for the successful completion of the project. 4. At the time of the application as well as prior to the commencement of the Fellowship the candidate must not be involve/work in any research project at the future hosting institute. 5. If your hosting institute

Level of Study: Postgraduate

Type: Fellowships, operating grants

Value: €60,000 will be awarded per scholarship

Frequency: Annual

Country of Study: Any country

Closing Date: 3 June

Funding: Private

The European Molecular Biology Organization (EMBO) was established in 1964 to promote biosciences in Europe. Today EMBO supports transnational mobility, training and exchange through initiatives such as fellowships, courses, workshops and its young investigator activities.

European Molecular Biology Organisation Award for Communication in the Life Sciences

Subjects: Public communication of science

Purpose: To promote and reward public communication of the life sciences and their applications by practising scientists in Europe

Eligibility: Open to scientists working in active research in an area of life sciences at the time of nomination. Candidates must be working in Europe or Israel, and the criterion for consideration is excellence in public communication of science via any medium or activity

Type: Monetary award and medal

Value: €5,000 accompanied by a silver and gold medal inscribed with the winner's name

Frequency: Annual

No. of awards offered: 27

Application Procedure: Applicants must apply using the forms available on the website

Closing Date: 1 May

Funding: Private

Contributor: EMBO

No. of awards offered last year: 1

No. of awards applicants last year: 27

The European Science Foundation (ESF) acts as a catalyst for the development of science by bringing together leading scientists and research funding agencies to debate, plan and implement pan-European initiatives.

European Science Foundation Response of the Earth System to Impact Processes (IMPACT) Mobility Grants

Subjects: The nature of impacts and their impact on nature, by studying the effects of impact events, both large and small, on the environment including atmospheric, climatic, biologic, and geologic interactions and their relations

Purpose: To initiate longer term research projects, encourage scientific exchanges, promote international and multi-disciplinary collaborations, and build strong ties between European institutions working on impact processes and their influence on the geological and biological evolution of the earth

Eligibility: Open to young scientists, graduate students or postdoctoral researchers. Established researchers can apply but must document that they do not have access to any other form of funding for this particular project. There are no restrictions regarding citizenship but applicants must be working in a European laboratory and applying for a stay in another European country

Level of Study: Graduate, Postdoctorate

Type: Other

Country of Study: Other

Application Procedure: Applicants must submit their personal details, institutional affiliation, brief curriculum vitae, a short invitation letter from the prospective host, a few keywords summarising the research, proposed investigation (maximum two printed pages in font size 12 or 600–1,000 words), significance of the investigation, justification of the collaborative research, and a detailed budget. One copy of the complete application must be sent to ESF and one to Dr Christian Koeberl at the University of Vienna

Contributor: The European Science Foundation

For further information contact:

Institute of Geochemistry, University of Vienna, Althanstrae 14, AUT -1090, Vienna, Austria

ESSO was founded to advance the art, science and practice of surgery for the treatment of cancer. ESSO endeavours to ensure that the highest possible standard of surgical treatment is available to cancer patients throughout Europe by organizing congresses, granting fellowships and publishing the EJSO.

European Society of Surgical Oncology Training Fellowships

Subjects: Surgical oncology

Purpose: To provide young surgeons a chance to spend time in another specialist centre to either expand their experience or learn new techniques

Eligibility: Open to applicants who are specialists/specializing in surgery (or in any other medical discipline where cancer surgery is performed). Applicants must be less than 40 years of age. European applicants may choose to visit European or non-European units, while non-European applicants must choose to visit a European center

Level of Study: Postdoctorate

Type: Fellowship

Value: €2,000 for standard fellowships and €10,000 for the major international training fellowship

Length of Study: 1 to 3 months for standard fellowships and up to 1 year for the major training fellowship

Frequency: Annual

Country of Study: Any country

No. of awards offered: 18

Application Procedure: Applicants must submit a full curriculum vitae with their application, together with a note of their career intentions. Applicants should also outline what they hope to gain from the training fellowship, including what specific experience is sought and how this will fit in with the applicant's career development. Applicants should provide details as to which institution they wish to visit, together with details of the clinical or research training opportunities that the department can offer. A letter of support from the applicant's head of department must be included and this can be in the form of a reference. A letter of support from the head of the department they wish to visit must also be supplied, indicating that the department to be visited will be in a position to provide the experience required by the applicant

Closing Date: 31 October

No. of awards offered last year: 11

No. of awards applicants last year: 18

Additional Information: Applicants must be or become ESSO members

For further information contact:

Email: carine@esso-surgeonline.org

European Space Agency

8-10 rue Mario Nikis, Cedex 15, 75738, Paris, France

Tel: (33) 153697654

Email: ContactESA@esa.int

Contact: European Space Agency

The European Space Agency (ESA) is Europe's gateway to space. Its mission is to shape the development of Europe's space capability and ensure that investment in space continues to deliver benefits to the citizens of Europe and the world.

European Space Agency's Postdoctoral Internal Research Fellowship Programme

Subjects: Space science, space applications or space technology

Purpose: ESA's postdoctoral Internal Research Fellowship programme (RIRF) aims to offer young scientists and engineers the possibility for two years to carry out research in a variety of disciplines related to space science, space applications or space technology

Eligibility: Applications are accepted from nationals of the ESA Member States and the European Cooperating States, together with Canada which has a cooperation agreement with ESA (see links on the right for details). Applicants must have recently completed their PhD in a field closely connected to space activities. The following requirements should be fulfilled in order for candidates to be qualified for the scholarship; Applications are accepted from nationals of the ESA Member States and the European Cooperating States, together with Canada which has a cooperation arrangement with ESA (see links on the right for information). Applicants need to have just recently finished their PhD in a field carefully linked to area activities

Type: Postdoctoral fellowship

Value: €3,000 to €3,800 per month depending on the location of the ESA Establishment

Length of Study: 2 years

Study Establishment: Space science, space applications or space technology

Country of Study: Any country

Application Procedure: Applications should be sent via the ESA online application form available in the 'how to apply' section of the opportunity. A cover letter, CV, and list of publications, with bibliographical references, should accompany the application, in one document (Word or PDF format). Each of the three referees named in the application form should send a reference letter to temp.htr-at-esa.int. No application sent after the closing date will be accepted

Closing Date: Fellowship is open for the academic year

Additional Information: For more details please refer to the link scholarship-positions.com/esas-postdoctoral-internal-research-fellowship-programme/2017/09/23/

For further information contact:

Contact: Ms Bénédicte Henry Canudas, Head of Recruitment

The European Synchrotron Radiation Facility (ESRF) supports scientists in the implementation of fundamental and applied research on the structure of matter in fields such as physics, chemistry, crystallography, Earth science, biology, medicine, surface science, and materials science.

European Synchrotron Radiation Facility Postdoctoral Fellowships

Subjects: Physics, biology, chemistry, mineralogy and crystallography, computer engineering and accelerators science

Purpose: To enable postdoctoral fellows develop their own research programme and motivate them to collaborate with external users

Eligibility: Preference is given to PhD students who obtained their PhD less than 3 years ago

Level of Study: Postdoctorate

Type: Fellowship

Value: The annual gross salary is fixed at €40,910 for the first two years. This salary may be increased during the third year depending upon performance

Length of Study: 2-3 years

Frequency: Dependent on funds available

Country of Study: France

No. of awards offered: 400

Application Procedure: Applicants must complete an application form, available on www.esrf.eu

Closing Date: Individual deadlines exist for each position. Please contact the organization

Funding: International office

Contributor: Public funds from 19 countries, mostly European

No. of awards offered last year: 27

No. of awards applicants last year: 400

Additional Information: Member countries are Belgium, Denmark, Finland, France, Germany, Italy, the Netherlands, Norway, Spain, Sweden, Switzerland and the United Kingdom. New associated members are the Czech Republic, Israel, Portugal and the Republic of Hungary, Poland, Austria, and Slovakia

For further information contact:

Email: recruitment@esrf.fr

European Synchrotron Radiation Facility Thesis Studentships

Subjects: Physics, biology, chemistry, mineralogy and crystallography, computer engineering and accelerators science. The ESRF proposes subjects related to the use of synchrotron radiation or synchrotron or storage ring technology

Purpose: To enable grant holders pursue a PhD at the ESRF and to enable young scientists acquire knowledge of the use of synchrotron radiation or its generation

Eligibility: Preference is given to member-country nationals, but other nationals may be accepted for the PhD's positions

Level of Study: Doctorate

Value: €2,280 per month. These amounts correspond to a gross remuneration and are subject to social charges and income tax in France

Length of Study: 2-3 years

Frequency: Dependent on funds available

Study Establishment: Universities

Country of Study: France

No. of awards offered: 300

Application Procedure: Applicants must complete an application form, available on www.esrf.eu

Closing Date: There is an individual deadline for each position

Funding: International office

Contributor: Public funds from 19 countries, mainly European

No. of awards offered last year: 20

No. of awards applicants last year: 300

Additional Information: Member countries are Belgium, Denmark, Finland, France, Germany, Italy, the Netherlands, Norway, Spain, Sweden, Switzerland and the United Kingdom. Newly associated members are the Czech Republic, Israel, Portugal and the Republic of Hungary, Poland, Austria and Slovakia

Doctor of Philosophy Scholarships in the Social Sciences

Subjects: The European University Institute (EUI) offers four-year fully-funded PhD programmes in Economics, History and Civilization, Law and Political and Social Sciences. Up to 150 scholarships are available for entry in September, covering tuition and providing a monthly grant. Our well-structured PhD programmes include closely supervised dissertation work, courses on methods and theory, topical workshops as well as academic and professional development training. Over 85% of EUI researchers successfully defend their thesis and more than 86% are either very satisfied or satisfied with their supervision. PhD researchers at the EUI enjoy: well-structured, fully funded PhD programmes; an academic environment that promotes research independence with close supervision, working groups, advanced training and courses; excellent research support facilities including an outstanding social science research Library, an on-site European Documentation Centre, and the Historical Archives of the European Union; a dynamic research community with visiting experts and high-level institutional and government actors from around the world; access to an international network of alumni holding posts in academia (60%), national-level institutions (7%), European Union institutions (5%), international organisations (6%), the private sector (2%), law firms and NGOs (8.5%), and banks (1%)* (*Alumni Destination Survey); an international, multi-lingual and culturally diverse campus near Florence, Italy. The European University Institute is an international postgraduate teaching and research institute. It offers advanced academic training for doctoral and postdoctoral researchers and fosters research in fields that are of particular interest for the development of Europe. The Institute is composed of four departments Economics, History and Civilization, Law, and Political and Social Sciences; the Robert Schuman Centre for Advanced Studies; the Max Weber Programme for Postdoctoral Studies; the School of Transnational Governance; and the Historical Archives of the European Union. Grants and tuition fees for

PhD candidates are covered by the national grant-awarding authorities of our contracting states

Purpose: Four-year fully-funded PhD programmes in the Social Sciences

Eligibility: Eligibility is determined by national grant-awarding authorities of EUI contracting states. For more detailed information visit www.eui.eu/phd

Level of Study: Doctorate

Type: Scholarship

Length of Study: Four years

Frequency: Annual

Study Establishment: European University Institute

Country of Study: Italy

Application Procedure: EUI's online application is open from early November to 31 January. For further information visit www.eui.eu/phd

Closing Date: 31 January

Funding: Government

Contributor: EUI contracting states and associate member states

Additional Information: The EUI community consists of over 900 academic staff and researchers from over 70 countries

EuroTech Universities Alliance

Square de Meeûs 23, 8th floor, BEL -1000, Brussels, Belgium

Email: info@eurotech-universities.eu

Contact: EuroTech Universities Alliance

The EuroTech Universities Alliance is a strategic partnership of four leading European universities of science & technology: Technical University of Denmark (DTU), Ecole Polytechnique Fédérale de Lausanne (EPFL), Eindhoven University of Technology (TU/e) and Technical University of Munich (TUM). Together they are committed to finding technical solutions, which address the major challenges of modern society. Their intensive collaboration across research, education & innovation support the European Union's goals of smart, sustainable and inclusive growth.

Collaborative Offline & Online Platform for Research EuroTechPostdoc Fellowships for International Students at European Universities

Subjects: Health & Bio Engineering, Smart & Urban Mobility, Data Science & Engineering, High-Performance Computing, Entrepreneurship & Innovation

Purpose: The EuroTechPostdoc Programme is a postdoctoral fellowship programme for young experienced researchers who have already demonstrated excellence and potential in their field of research

Eligibility: Applicants of all nationalities are eligible. Please refer the website for more details

Type: Postdoctoral fellowship

Value: The fellowship consists of a monthly salary for the postdoctoral researcher based on the salary scale of the host institution and is granted for a period of twenty-four (24) months maximum. Prolongation of the fellowship is not possible

Study Establishment: Applicants may apply within one of the five focus research areas of the EuroTech Universities Alliance: Health & Bio Engineering Smart & Urban Mobility Data Science & Engineering High-Performance Computing Entrepreneurship & Innovation

Country of Study: Any country

Application Procedure: Please use the following templates for your application: 1. Project proposal template. 2. CV and publications template. 3. Ethics self-assessment

Closing Date: 28 February

Additional Information: For more details, please browse the below website, scholarship-positions.com/80-eurotechpostdoc-fellowships-international-students-european-universities

For further information contact:

Email: postdoc@eurotech-universities.eu

EuroTechPostdoc

Subjects: Interdisciplinary bottom-up research projects in the following research focus areas are invited to submit their proposal: 1. Health & Bioengineering. 2. Smart & Urban Mobility. 3. Data Science & Engineering. 4. High Performance Computing. 5. Entrepreneurship & Innovation. The focus areas present the main interdisciplinary research areas of the EuroTech partners within the alliance, so they should be understood as indicators and not as limiting factors per se. It is important that you find a host and co-host at the EuroTech universities willing to support and supervise your project. The focus areas should guide you towards common research interests

Purpose: The EuroTech Universities Alliance invites highly talented experienced researchers to submit interdisciplinary collaborative research project proposals for one of the fellowships provided by the EuroTechPostdoc Programme. The Programme is a postdoctoral fellowship for young experienced researchers who have already demonstrated excellence and potential in their field of research. It provides its fellows exceptional international research and career development opportunities to promote their outstanding individual potential into a distinct, innovative and competitive profile of a researcher. The EuroTechPostdoc Programme is co-funded by the European Commission under its framework programme Horizon. All fellows of the EuroTechPostdoc programme will be Marie Skłodowska-Curie Fellows. Four of the six universities of the EuroTech Universities Alliance - Technical University of Denmark (DTU), Ecole Polytechnique Fédérale de Lausanne (EPFL), Eindhoven University of Technology (TU/e) and Technical University of Munich (TUM) - will grant 80 fellowships divided over two calls for experienced researchers. Per call, each university grants 10 fellowships for a 24-month period to collaborative and interdisciplinary research projects across the Alliance

Eligibility: Experience: Applicants must hold a PhD degree from a recognised university or plan to obtain a PhD degree by the time of employment or have at least four years of full-time equivalent research experience. Mobility: Researchers may not have resided or carried out their main activity (work, studies, etc.) in the country of the host university for more than twelve (12) months in the three (3) years immediately before the call deadline. Time spent as part of a procedure for obtaining refugee status under the Geneva Convention, compulsory national service and/or short stays such as holidays are not taken into account. Institutional Endorsement: Support from both the host and co-host. Please approach them early on. A standard process will be provided in the application portal. You will have to provide the email address of your supervisor and co-supervisor (please check spelling). The programme management office will approach host and co-host professors and ask them to provide the institutional endorsement. The Institutional endorsement comprises a confirmation of the availability of infrastructure, supervision and resources to successfully complete the project. Applicants must be able to carry out full time research during the fellowship period (parental leave, sick leave, military leave and care leave are accepted). Research direction follows the H2020 Ethics

Level of Study: Postdoctorate

Type: A variable number of fellowships

Value: complete salary covered (depending on country)

Length of Study: up to 24 months

Frequency: Annual, if funds are available

Country of Study: Other

No. of awards offered: 87

Application Procedure: Applications to be supported via online participants portal by the respective deadline. Applications are assessed against criteria addressing the candidate's ability and commitment to research, the quality of the proposed research project as well as the synergy between the research proposed and the identified host and co-host, and the impact of the research project on the career development of the candidate. More information can be found here: postdoc.eurotech-universities.eu/for-applicants/#eval

Closing Date: 28 February

Funding: Government

Contributor: European Commission: This project has received funding from the European Union's Horizon research and innovation programme under the Marie Skłodowska-Curie grant agreement No 754462

Evonik Foundation

Rellinghauserstr. 1-11, DEU 45128, Essen, Germany

Tel: (49) 201/177 4326

Email: info@evonik-stiftung.de

Contact: Evonik Foundation

The Evonik Foundation exclusively supports natural science students preparing master's, doctoral, and postdoctoral theses. Scholarships are only awarded for the scholarship focus defined for the year in question.

Evonik Stiftung Scholarships

Subjects: Organosilicones, Synthesis, Cross-linking, Phase Behaviour & Material Properties and Fillers

Purpose: The Evonik Foundation focuses on promoting education and science. The goal of Evonik Foundation is to sponsor talented up-and-coming researchers

Eligibility: Prerequisites for the award of a scholarship: The topic of your research project must coincide with one of the topics in our annual scholarship focus. 1. Your scientific research is being conducted in a well-known, chemically oriented working group at a German university or a non-university research institution. 2. You can provide proof of excellent academic performance. 3. You are unable to sufficiently fund your intended scientific study courses with means provided by you, your parents or other parties
