
W.F. Albright Institute of Archaeological Research

Sean W. Dever Memorial Prize

Purpose: The W.F. Albright Institute of Archaeological Research in Jerusalem announces the Sean W. Dever Memorial Prize call for papers. This prize provides \$750 for the best article published or paper presented at a conference that treats a topic in the field of Syro-Palestinian or Biblical Archaeology

Eligibility: Authors must be PhD candidates in the semester in which the winner is announced. They may be of any nationality, but the article or paper must be in English. Co-written or co-presented pieces may be submitted if all the authors or presenters are doctoral candidates; the prize, if awarded, will be divided equally among authors or presenters. All submissions must be in PDF format only

Level of Study: Postgraduate

Type: Prize

Frequency: Annual

Country of Study: Any country

Application Procedure: The submission of conference papers must include images (if used in the presentation) in PDF format (either as a separate document or embedded within the text of the paper), and full citations and bibliographic references. Kindly submit the initial documents through the following link. aiarfellowships.fluidreview.com

Closing Date: 31 December

Funding: Private

Wageningen University

Wageningen University & Research Africa Scholarship Program

Purpose: Applications are open for the Wageningen University & Research Africa Scholarship Program. The Africa Scholarship Program (ASP) has been initiated by Wageningen University & Research to give talented and motivated students from Africa the opportunity to study at the university in Wageningen. With this programme, Wageningen wants to support capacity building in Africa by attracting excellent students for a 2-years master's program. Wageningen University & Research is a collaboration between Wageningen University and the Wageningen Research foundation

Eligibility: 1. African students who want to start their study in September may be eligible for the scholarship. 2. Excellent students with a GPA of 80% or higher in a bachelor degree, and admitted to a Wageningen University MSc Program

Level of Study: Postgraduate

Type: Scholarship

Frequency: Annual

Country of Study: Any country

Closing Date: 1 February

Funding: Foundation

Wal-Mart Foundation

Walmart Dependent Scholarship

Purpose: This award is for graduating high school seniors who are dependents of actively employed Walmart

associates within any division of Walmart for at least six consecutive months as of the application deadline. Students must have a grade point average of 2.0 or higher and must demonstrate financial need

Eligibility: 1. Must be a high school or home school senior graduating or earning a GED between 1 August, and 31 July. 2. Must be a United States citizen or a United States permanent legal resident. 3. Must be the dependent of an actively employed Walmart associate (employee) within any division of Walmart for at least six consecutive months as of the application deadline date. 4. Must have a cumulative high school grade point average of 2.0 or higher on a 4.0 scale. 5. This award is for United States students

Level of Study: Graduate

Type: Scholarship

Value: US\$3,250

Frequency: Annual

Country of Study: Any country

Application Procedure: Apply online: aim.applyISTS.net/WALDEPS

Closing Date: 2 April

Washington Conservation Guild

National Air and Space Museum - Engen Conservation Fellowship

Purpose: Fellows will be encouraged to develop a research project while at NASM. The independent research will be derived from the diverse collection of materials and may be related to evaluations of treatment procedures, ethical considerations, or technical studies

Eligibility: 1. The ideal candidate will have a Master's degree in conservation from a recognized program and be able to conduct research independently. The candidate should have knowledge of ethical and professional principles and concepts related to the preservation of objects in a wide variety of media. 2. They should also understand the theories, principles, techniques, practices, and methodologies used to examine, study, treat, analyze and preserve historic objects. 3. Applicants should have a proven record of research, writing ability, and verbal communication skills

Level of Study: Graduate, Postgraduate

Type: Fellowship

Frequency: Annual

Country of Study: Any country

Closing Date: 15 January

investigators@wellcome.ac.uk
Website: www.wellcome.ac.uk

The Wellcome Trust's mission is to foster and promote research with the aim of improving human and animal health. The Trust funds most areas of biomedical research and funds research in the history of medicine, biomedical ethics, public engagement of science.

Arts Awards

Subjects: The scheme aims to: stimulate interest, excitement and debate about biomedical science through the arts; examine the social, cultural, and ethical impact of biomedical science; support formal and informal learning; encourage new ways of thinking; encourage high quality interdisciplinary practice and collaborative partnerships in arts, science and/or education practice. All art forms are covered by the programme: dance, drama, performance arts, visual arts, music, film, craft, photography, creative writing or digital

media. The Trust invites applications for projects which engage adult audiences and/or young people

Purpose: Arts Awards support imaginative and experimental arts projects that investigate biomedical science

Eligibility: The scheme is open to a wide range of people including, among others, artists, scientists, curators, filmmakers, writers, producers, directors, academics, science communicators, teachers, arts workers and education officers. Applicants are usually affiliated to organizations, but can apply as individuals. Organizations might include: museums and other cultural attractions; arts agencies; production companies; arts venues; broadcast media; schools; local education authorities; universities and colleges; youth clubs; community groups; research institutes; the NHS; and science centres. Partnership projects (between different people and organizations, e.g. scientists and ethicists, educators and artists) are welcomed. If this is the first time an organization is applying to the Wellcome Trust an eligibility assessment will be carried out. For this assessment, the following documentation from the applying organization should be submitted: articles of association; audited accounts from the previous 2 years; details of similar projects/grant funding received; confirmation that no funding has been received or is scheduled to be received from any tobacco company

Level of Study: Research

Type: Award

Value: Funding can be applied for at two levels: (1) Small to medium-sized projects (up to and including £40,000). This funding can either be used to support the development of new project ideas, deliver small-scale productions or workshops, investigate and experiment with new methods of engagement through the arts, or develop new collaborative relationships between artists and scientists and (2) Large projects (above £40,000). This funding can be used to fund full or part production costs for large-scale arts projects that aim to have significant impact on the public's engagement with biomedical science. We are also interested in supporting high-quality, multi-audience, multi-outcome projects. Applicants can apply for any amount within the above boundaries, for projects lasting a maximum of 3 years

Frequency: Annual

Application Procedure: Application form for awards up to and including £40,000, preliminary application form for awards over £40,000

Closing Date: For small to medium-sized projects (up to and including £40,000) deadlines are 28 February, 27 June, and 7 November. For large projects (above £40,000) the deadline is 24 January. For detail information check website

Funding: Trusts

Additional Information: Applicants must be based in the United Kingdom or the Republic of Ireland and the activity must take place in the United Kingdom or the Republic of Ireland

For further information contact:

Tel: (44) 20 7611 5757

Email: PEgrants@wellcome.ac.uk

Broadcast Development Awards

Subjects: We are interested in funding individuals and organizations with brilliant early-stage ideas for TV, radio or new media projects. Our funding will enable these ideas to be developed into high impact, well-researched proposals to be utilized in securing a broadcast platform and/or further funding. A successful project would primarily be aimed at a mainstream United Kingdom and/or Republic of Ireland audience in the first instance, although the subject matter can be international

Purpose: To support the development of broadcast proposals in any genre that engages the audience with issues around biomedical science in an innovative, entertaining and accessible way

Eligibility: The proposal must primarily be aimed at a mainstream United Kingdom and/or Republic of Ireland audience in the first instance but the subject matter can be international. Applicants are usually affiliated to organizations, but can apply as individuals. The scheme is open to broadcast professionals and other organizations or individuals working on broadcast projects. Partnership between broadcasters and other professionals such as scientists, ethicists, educators etc. are especially welcomed

Level of Study: Research

Type: Award

Value: Up to £10,000, for a maximum of 1 year

Length of Study: 1 year

Application Procedure: Candidates should complete and submit an application form by the published deadline

Closing Date: Refer website

Funding: Trusts

Additional Information: Applicants must be based in the United Kingdom or the Republic of Ireland, although other members of the project team can be based overseas

For further information contact:

Tel: (44) 20 7611 5757

Email: PEgrants@wellcome.ac.uk

Career Re-Entry Fellowships

Subjects: Biomedical Science

Purpose: This scheme is for postdoctoral scientists who have recently decided to recommence a scientific research career after a continuous break of at least 2 years

Eligibility: The awards are open to individuals with a relevant connection to the European Economic Area (EEA). You should be a research scientist with at least 2 years' postdoctoral experience and intend to be based in a United Kingdom or Republic of Ireland organization. You must have had a continuous career break of at least 2 years and should have either a strong research track record (if applying for up to 4 years' support) or demonstrated the potential for a strong research career prior to your break (if applying for 2 years' support). A 2-year fellowship should provide sufficient training support to consolidate your potential. The proposed research should fall within the Wellcome Trust's normal funding remit. Resubmissions are not normally encouraged. If your application has been unsuccessful, please contact the Office for advice. You must have an eligible sponsoring laboratory in the United Kingdom or Republic of Ireland that will administer the fellowship for the duration of the award

Level of Study: Professional development

Type: Fellowship

Value: It provides support that includes the fellow's salary, as determined by the host institution with an additional Trust enhancement, and Research expenses (consumables, animals, travel support to attend scientific meetings)

Length of Study: 2–4 years

Application Procedure: A preliminary application form (Word 92kB) should be completed and submitted by the published deadline. It should be sent electronically (as a Word document), with the requested accompanying information, to the appropriate funding stream at the Trust (see website). If successful, you will be shortlisted for interview

Closing Date: 15 May, 5pm (preliminary applications); 17 July, 5pm (full applications); and 11–13 November (shortlisted candidate interviews)

Funding: Trusts

Additional Information: For further information visit www.wellcome.ac.uk/Funding/Biomedical-science/Funding-schemes/Fellowships/Basic-biomedical-fellowships/wtd004380.htm

For further information contact:

Tel: (44) 20 7611 5757

Email: sciencegrants@wellcome.ac.uk

Clinical PhD Programmes

Subjects: Biomedical science

Purpose: This is a flagship scheme aimed at supporting the most promising medically qualified clinicians who wish to undertake rigorous research training

Eligibility: You should have demonstrated the potential to pursue a career as an academic clinician. It is anticipated that many applicants will have already commenced their specialist training, but this is not essential

Level of Study: Postgraduate, Research

Type: Grant

Value: The duration may vary from Programme to Programme, but each provides a clinical salary, PhD registration fees at United Kingdom/EU student rate, research expenses, contribution towards travel and contribution towards general training costs

Frequency: Annual

Country of Study: African countries

Application Procedure: Students are recruited annually by the individual Programmes. Recruitment begins in the preceding January. If you are interested in applying you should contact the relevant Programme directly. Please see website for more details

Closing Date: Varies

Funding: Trusts

For further information contact:

Email: clinicalphd@wellcome.ac.uk

Doctoral Studentships

Subjects: Medical history and humanities

Purpose: This scheme enables scholars to undertake up to 3 years of full-time research on a history of medicine topic leading to a doctoral degree at a university in the United Kingdom or Republic of Ireland

Eligibility: You should hold a Master's in the history of medicine or a Master's with strong emphasis on the history of medicine. The proposed project must be on a history of medicine topic. If specialist language skills are essential to undertake the research, a Master's in the language required may be acceptable (classical languages, Arabic, Chinese, etc.). Your application must be sponsored by a senior member of the department, unit or institute, or History of Medicine grantholder (current or former), who would supervise you if an award were made. Applications must be submitted through the host institution

Level of Study: Postgraduate, Research

Value: Support is provided for up to 3 years, and includes: the student's stipend; a set amount to cover conference travel, research expenses and, where justified, the cost of overseas fieldwork; all compulsory university and college fees at the United Kingdom/Irish/Dutch home postgraduate student level; fees at the overseas rate will not be provided; institutions sponsoring candidates are expected to provide

laptops and PCs as part of their postgraduate research-training infrastructure

Length of Study: 3 years

Application Procedure: Preliminary applications should be made by email or post by the published deadline, and should include: a brief curriculum vitae with details of the Master's degree held; details of the research proposed (maximum of one page); a letter of support from the head of the department in which you will be working (this can be sent under separate cover); a letter of support from the supervisor

Closing Date: 2 April

Funding: Trusts

For further information contact:

Tel: (44) 20 7611 5757

Email: MHgrants@wellcome.ac.uk

Four-year PhD Studentship Programmes

Subjects: Biomedical science

Purpose: This is a flagship scheme aimed at supporting the most promising students to undertake in depth postgraduate training. Supporting specialized training provided in a range of important biomedical research areas: (1) developmental biology and cell biology; (2) genetics, statistics and epidemiology; (3) immunology and infectious disease; (4) molecular and cellular biology; (5) neuroscience; (6) physiological sciences; (7) structural biology and bioinformatics

Eligibility: You should be a student who has, or expects to obtain, a first- or upper-second-class honours degree or equivalent

Level of Study: Postgraduate, Research

Value: A stipend, PhD registration fees at United Kingdom/EU student rate, contribution towards laboratory rotation expenses in the first year, research expenses for years two to four, contribution towards travel and contribution towards transferable-skills training

Length of Study: Support provided for 4 years

Application Procedure: Students are recruited annually by the individual Programmes for uptake in October each year. Recruitment begins in the preceding December. If you are interested in applying you should contact the relevant Programme directly. Please see website for details

Closing Date: October

Funding: Trusts

For further information contact:

Email: 4yrphd@wellcome.ac.uk

Intermediate Clinical Fellowships

Subjects: Biomedical science

Purpose: This scheme is for medical, dental, veterinary or clinical psychology graduates who have had an outstanding start to their research career. It will enable successful candidates to continue their research interests at a postdoctoral level in an appropriate unit or clinical research facility

Eligibility: The award is open to individuals with a relevant connection to the EEA. You should have previously undergone a period of research training and will have completed, or be about to complete, a higher degree. You should have completed general professional training as defined by the relevant college. (1) Medical and dental candidates should either have a National Training Number (NTN) or Certificate of Completion of Specialist Training (CCST) or equivalent. (2) Veterinary candidates should have a degree in veterinary medicine (e.g. BVSc, BVM&S, BVMS, BVetMed, VetMB) and some experience in clinical practice and will have completed, or be about to complete, a higher research degree (preferably a PhD). (3) GPs are advised to contact the office to clarify their eligibility. (4) Clinical Psychologists must have obtained a professional Doctorate-level qualification in Clinical Psychology accredited by the British Psychological Society

Level of Study: Postgraduate, Research

Type: Fellowship

Value: Fellowships are for up to 4–5 years, depending on situation. They provide research expenses (consumables, travel, support to attend scientific meetings) and the fellow's salary, set by the host institution according to age and experience. Requests for specific items of equipment, where relevant, may be considered, and research or technical assistance may be requested. However, a laboratory appropriate to the research proposed should be selected, and the necessary facilities required for the proposed research must be available to the candidate. Funding for a period of research abroad may be requested if scientifically justified, and we provide appropriate allowances for fellows based overseas

Frequency: Annual

Application Procedure: A preliminary application form should be completed and submitted at any time before the appropriate deadline. It should be sent electronically (as a Word document) to the appropriate funding stream at the Trust (see website). If your preliminary application is successful, you will be invited to submit a full application by the published deadline. This will be peer reviewed and considered by the relevant Funding Committee. Shortlisted candidates will subsequently be invited to attend for interview at the Trust

Closing Date: 8 March; please visit the following link for full details: www.wellcome.ac.uk/Funding/Biomedical-science/Funding-schemes/Fellowships/Clinical-fellowships/wtd004402.htm

Funding: Trusts

For further information contact:**Tel:** (44) 20 7611 5757**Email:** sciencegrants@wellcome.ac.uk**Intermediate Fellowships in Public Health and Tropical Medicine****Subjects:** Biomedical science

Purpose: This scheme enables high-calibre, mid-career researchers from low- and middle-income countries to establish an independent research programme. Fellows must be based primarily in a low- and middle-income country. Research projects should be aimed at understanding and controlling diseases (either human or animal) of relevance to local, national or global health. This can include laboratory based molecular analysis of field or clinical samples, but projects focused solely on studies in vitro or using animal models will not normally be considered under this scheme

Eligibility: Applications are only accepted in the Public Health and Tropical Medicine Interview Committee remit. This covers research on infectious and non-communicable diseases within the fields of public health and tropical medicine that is aimed at understanding and controlling diseases (either human or animal) of relevance to local, national or global health. You must be a national or legal resident of a low- and middle-income country and should be either: (1) A graduate in a subject relevant to public health or tropical medicine (e.g. biomedical or social science, veterinary medicine, physics, chemistry or mathematics) with a PhD and 3–6 years' postdoctoral experience, or (2) A medical graduate with a higher qualification equivalent to membership of the United Kingdom Royal Colleges of Physicians (i.e. qualified to enter higher specialist training) or recognized as a specialist within a relevant research area, with 3–6 years' research experience. You must have a relevant high-quality publication record and show potential to become a future scientific leader. Applicants who do not have a PhD but who are educated to first degree or Master's level and have extensive research experience, as evidenced by their publication record, may be considered

Level of Study: Postgraduate, Research**Type:** Fellowship

Value: Fellowships are for up to 5 years (non-renewable) and provide support that includes: a basic salary for the fellow; research expenses (e.g. consumables, equipment, collaborative travel, research assistance, technical support); training costs where appropriate and justified; an inflation/flexible funding allowance and support to attend scientific meetings. Contributions to costs of the project which are directly incurred by the overseas institution may be provided

Application Procedure: You must complete and submit a preliminary application form by the published deadline. The form should be emailed to phatic@wellcome.ac.uk. Completed forms will normally be assessed within 1 month of the preliminary deadline. If the preliminary application meets the scheme's requirements, a full application will be invited

Closing Date: Preliminary application deadline: 23 May, Full application deadline: 18 July, Shortlisted candidate interviews: 22–23 November

Funding: Trusts

Additional Information: For complete details please check the link www.wellcome.ac.uk/Funding/Biomedical-science/Funding-schemes/Fellowships/Public-health-and-tropical-medicine/wtd025883.htm

For further information contact:**Tel:** (44) 20 7611 5757**Email:** sciencegrants@wellcome.ac.uk**International Engagement Awards**

Subjects: International Engagement Awards support projects that aim to achieve some or all of the following: to strengthen the capacity of people in low- and middle-income countries to facilitate public engagement with health research; to stimulate dialogue about health research and its impact on the public in a range of community and public contexts in low- and middle-income countries; to investigate and test new methods of engagement, participation, communication or education around health research; to promote collaboration on engagement projects between researchers and community or public organizations; to support Wellcome Trust funded researchers in low- and middle-income countries in engaging with the public and policy makers. Projects could involve: communities and members of the public (particularly those affected by or involved in health research); science communicators, health and science journalists; healthcare professionals, educators, field workers, community workers policy and decision makers

Purpose: To provide funding for innovative public or community engagement projects that explore biomedical research or health in Africa and Asia and to ensure science can be enjoyed and experienced as part of culture, entertainment and everyday life

Eligibility: The scheme is open to a wide range of people, including media professionals, educators, science communicators, health professionals and researchers in bioscience, health, bioethics and history. Partnership projects (between different people and organizations, e.g. scientists and media professionals, ethicists and community workers) are

welcomed. Applicants must be based in listed low- and middle-income countries or in the United Kingdom working with partners in the low- and middle-income countries. The activity must primarily take place in one or more low- and middle-income countries and the primary goal must be to involve participants or engage audiences located in low- and middle-income countries. Applicants from listed restructuring countries in Europe and Asia are not eligible. We can only accept applications in the English language but we welcome projects that bring together people from different backgrounds who speak diverse languages. All projects must involve engagement with health research. Projects dealing purely with development research not related to health are not eligible. Please note also, that the scheme is not intended to support standard delivery of health education and promotion which does not focus on health research or involve health researchers. Applicants must be affiliated to organizations or institutions. Organizations might include: media organizations, research centres or research groups, community-based development organizations, education organizations. The International Engagement Awards will not fund traditional scientist-led health research. We may consider an application for participatory health research. This is research in which participants are supported to own and shape a research process, setting their own research questions and directing the research process. This type of research should not look like a consultative exercise or health education but should aim to be collaborative process of enquiry in which the analysis is conducted and findings can be used by all participating parties. This could lead into circular processes of research and action

Level of Study: Research

Type: Award

Value: Up to £30,000 for projects lasting a maximum of 3 years

Application Procedure: Please contact the International Engagement Awards office well in advance of the deadline to request an application form and to confirm the eligibility of your project

Closing Date: 19 August

Funding: Trusts

For further information contact:

Tel: (44) 20 7611 5757

Email: PEgrants@wellcome.ac.uk

Investigator Awards

Subjects: Biomedical science

Purpose: To support world-class researchers who are no more than 5 years from appointment to their first academic

position, but who can already show that they have the ability to innovate and drive advances in their field of study

Eligibility: To be eligible for an Investigator Award you must be based at an eligible higher education or research institution in the United Kingdom, Republic of Ireland or a low- or middle-income country. You should be employed in an established academic post: a permanent, open-ended or long-term rolling contract, salaried by your host institution. You are also eligible if you have a written guarantee of an established academic post at your host institution, which you will take up by the start of the award. If you are based in a low- or middle-income country in sub-Saharan Africa, South-east Asia or South Asia (with the exception of India - see below), you are eligible to apply if you fulfil the above eligibility criteria and are working within the Trust's broad science funding remit

Level of Study: Research

Type: Award

Value: Awards may be small or large, typically up to £3,000,000, and lasting up to 7 years. The duration and costs you request should be clearly justified by your proposed research. Also, you should ensure that the scope of your proposal and the associated resources are appropriate for your career stage and research experience. The award covers the direct costs of carrying out the research, such as: research expenses; this may include research assistance, animals, equipment, fieldwork costs and funding for collaborative activity; travel and subsistence for scientifically justified visits; overseas allowances where appropriate

Frequency: Annual

Application Procedure: The key stages of the application process are: submission of an Investigator Award application form; scientific peer review by one of the Trust's Expert Review Groups, which shortlist the candidates for interview; written peer review of shortlisted applications by external specialist referees, who will include members of the Trust's Peer Review College; selected unattributed referee comments will be fed back to candidates before interview; interview of shortlisted candidates by our Interview Panel. Application forms are available on eGrants, our electronic application system. Please refer to the Additional information for completing the Investigator Award form on eGrants, which provides an overview to help guide you through the application process

Funding: Trusts

Additional Information: The Trust has combined its New Investigator and Senior Investigator Award schemes to create a single type of Investigator Award, providing all who hold established posts in eligible organizations with the same opportunity to obtain funding

For further information contact:

Email: sciencegrants@wellcome.ac.uk

Master's Awards

Subjects: Medical history and humanities

Purpose: This scheme enables scholars to undertake basic training in research and methods through a 1-year Master's course in medical history and humanities

Eligibility: You should have a minimum of an excellent upper-second-class honours degree (or equivalent) in a relevant subject. Applications will not be considered from those who have already received support for their postgraduate studies from another funding body

Level of Study: Postgraduate, Research

Type: Award

Value: The award is for 1 year, and includes: the student's stipend; all compulsory university and college fees at the United Kingdom home postgraduate student level. Fees at the overseas rate will not be provided

Frequency: Annual

Application Procedure: All enquiries about Master's Awards should be made directly to the relevant institution

Closing Date: 1 May

Funding: Trusts

For further information contact:

Tel: (44) 20 7611 5757

Email: MHgrants@wellcome.ac.uk

Master's Fellowships in Public Health and Tropical Medicine

Subjects: Biomedical science

Purpose: This scheme strengthens scientific research capacity in low- and middle-income countries, by providing support for junior researchers to gain research experience and high-quality research training at Master's degree level. Research projects should be aimed at understanding and controlling diseases (either human or animal) of relevance to local, national or global health. This can include laboratory based molecular analysis of field or clinical samples, but projects focused solely on studies in vitro or using animal models will not normally be considered under this scheme

Eligibility: You should be: (1) A national or legal resident of a low- and middle-income country, and hold a first degree in subject relevant to tropical medicine or public health (clinical or non-clinical). (2) At an early stage in your career, with limited research experience, but have a demonstrated interest in or aptitude for research

Level of Study: Postdoctorate, Postgraduate, Research

Type: Fellowship

Value: This fellowship normally provides up to 30 months' support. A period of 12 months should normally be dedicated

to undertaking a taught Master's course at a recognized centre of excellence, combined with up to 18 months to undertake a research project. While undertaking a Master's course, fellows will receive a stipend in accordance with the cost of living in the country in which he/she will be studying; travel costs and support for approved tuition fees. Master's training by distance learning is acceptable. Master's course fees will be paid according to the rate charged by the training institution

Application Procedure: A completed application form should be submitted by the sponsor by the published deadline. The form should be emailed to phatic@wellcome.ac.uk. The application should include details of your sponsor's track record in training and a list of their other students at the institution. It must be supported by the head of the institution where the research will be based, and a career plan for the proposed candidate must be included

Closing Date: 2 March (for applications submissions)

Funding: Trusts

Additional Information: For complete details go to address www.wellcome.ac.uk/Funding/Biomedical-science/Funding-schemes/Fellowships/Public-health-and-tropical-medicine/wtd025881.htm

Pathfinder Awards

Purpose: This scheme, offering pilot funding to catalyse innovative early-stage applied research and development projects in areas of unmet medical need, has been expanded. It now funds discrete projects from applicants in the United Kingdom and Republic of Ireland as well as partnerships between academia and industry based anywhere in the world

Eligibility: Applications are welcome from academic and commercial organizations based in the United Kingdom or the Republic of Ireland. Applications from organizations and companies overseas will only be considered when applying in partnership. Check website for complete details

Level of Study: Research

Type: Grant

Value: The average award amount is envisaged to be in the region of £1,00,000, but up to £3,50,000 will be considered in exceptional circumstances

Length of Study: 18 months

Frequency: Dependent on funds available

Application Procedure: You should contact us to confirm that your proposed application (and partnership, if appropriate), is eligible before submitting a full application form. After confirming that your application is eligible, you should

complete the full application form (see 'Forms and guidance') and send it to innovations@wellcome.ac.uk before the deadline

Closing Date: February (There will be four deadlines a year, subject to available budget.)

Funding: Trusts

For further information contact:

Email: innovations@wellcome.ac.uk

Postdoctoral Research Training Fellowships for Clinicians

Subjects: Biomedical science

Purpose: This is a flexible fellowship scheme to enable individuals to engage with areas of research that are new to them. It is for candidates who either undertook a PhD early in their career and now wish to refresh their research skills, or have recently completed a successful PhD and wish to explore a new research field or environment, to gain the skills that will help them answer their longer-term research vision

Eligibility: The scheme may be suitable for clinicians who: are due to complete their higher degree or are no more than 2 years from the date of their PhD viva by the full application deadline; graduated with a MB/PhD qualification or have achieved a high-quality PhD in a relevant subject, either during or prior to commencing their initial medical, veterinary or dental degree

Level of Study: Postgraduate, Research

Type: Fellowship

Value: Awards are for 2–4 years, depending on whether or not you are planning to reintegrate into your clinical training programme. The total cost of a Fellowship would typically range from £250,000 to £400,000

Frequency: Annual

Application Procedure: A preliminary application form should be completed and submitted at any time before the published deadline. It should be sent electronically (as a Word document) to Dr Lucy Bradshaw (see website for contact details). If your preliminary application is successful, you will be invited to submit a full application. This will be reviewed and if successful you will be shortlisted for interview

Closing Date: 18 May (5pm) for preliminary application; 13 July (5pm) for full application deadline; and 19–20 November (CIC) and 25–27 November (PHATIC) for shortlisted candidate interviews

Funding: Trusts

Additional Information: For more details see www.wellcome.ac.uk/Funding/Biomedical-science/Funding-schemes/Fellowships/Clinical-fellowships/wtp052588.htm

For further information contact:

Tel: (44) 20 7611 5757

Email: sciencegrants@wellcome.ac.uk

Principal Research Fellowships

Subjects: Biomedical science

Purpose: This is the most prestigious of our personal awards and provides long-term support for researchers of international standing. Successful candidates will have an established track record in research at the highest level

Eligibility: You should have an established track record in research at the highest level. This award is particularly suitable for exceptional senior research scientists currently based overseas who wish to work in the United Kingdom or Republic of Ireland

Level of Study: Postgraduate, Research

Type: Fellowship

Value: Awards are for 7 years in the first instance, and provide both a personal salary and research programme funding in full. After the first period of award, the fellowship will be subject to a competitive scientific review, which will subsequently occur on a rolling basis every 5 years

Length of Study: 7 years

Application Procedure: If you intend to apply you should contact us with a full curriculum vitae, preferably 18 months in advance of the desired award date. You may not apply for more than one Wellcome Trust fellowship scheme at any one time

Closing Date: Applicants can express interest at any time. Interview usually held in June and December

Funding: Trusts

For further information contact:

Tel: (44) 20 7611 5757

Email: sciencegrants@wellcome.ac.uk

Research and Development for Affordable Healthcare in India

Subjects: Projects covering any aspect of technology development for healthcare will be considered, including diagnostics, therapeutics, vaccines, medical devices and regenerative medicine. Proposals drawing on the disciplines of the physical sciences, maths and engineering, as well as biomedicine, are equally encouraged

Purpose: The objective of this initiative is to fund translational research projects that will deliver safe and effective healthcare products for India, and potentially other markets, at affordable costs. A key feature of the scheme is that it

encourages innovations that bring together researchers from both the public and private sectors to extend access to care to the greatest numbers of beneficiaries, without compromising on quality

Eligibility: Awards will be agreed by Committee and governed by the terms and conditions, including Wellcome Trust Grant Conditions, funding terms for Affordable Healthcare. In addition there will be additional terms and conditions that will be negotiated under the funding agreement for the award with the applicant

Level of Study: Research

Type: Award

Value: Awards will be made by way of funding agreements that will be negotiated on a case-by-case basis. The principles of the Wellcome Trust Grant Conditions will apply. The terms and conditions of funding will be discussed with applicants individually. Typically, the agreements will contain a provision for the appropriate sharing of benefits. The funds available will be ring-fenced for the specified programme of work. Neither working capital nor building or refurbishment expenditure will be provided. Funding will be released in tranches against the attainment of pre-agreed project milestones

Application Procedure: In the first instance interested applicants should contact Dr Shirshendu Mukherjee to discuss their interest in funding via the Affordable Healthcare Initiative. Alternatively, applicants may complete a concept note and mail this directly to Dr Shirshendu Mukherjee

Closing Date: 31 January

Funding: Trusts

For further information contact:

Email: s.mukherjee@wellcome.ac.uk

Contact: Dr Shirshendu Mukherjee, Senior Strategic Adviser

Research Career Development Fellowships in Basic Biomedical Science

Subjects: Biomedical Science

Purpose: To provide support for outstanding postdoctoral scientists based in academic institutions in the United Kingdom and Republic of Ireland (RoI)

Eligibility: You should have a relevant connection to the European Economic Area. You are expected to have science or veterinary qualifications and, at the preliminary application stage, should normally have between three and 6 years' research experience from the date of your doctoral degree (PhD viva). Due allowance will be given to those whose career has been affected for personal reasons. You must have made intellectual contributions to research that have

been published in leading journals, and be able to demonstrate your potential to carry out independent research. The proposed research should fall within our normal funding remit. Resubmissions are not normally encouraged. If your application has been unsuccessful, please contact the Office for advice. You must have an eligible sponsoring host institution in the United Kingdom or Republic of Ireland (RoI) and an eligible sponsor who can guarantee space and resources for the tenure of any award

Level of Study: Postdoctorate, Research

Type: Fellowship

Value: (1) A basic salary, as determined by the host institution, with an additional Wellcome Trust enhancement. (2) Research expenses, including research assistance if required (normally a graduate research assistant or technician; requests for additional research staff may be considered where fieldwork or clinical studies in a low- or middle-income country are proposed). (3) Overseas allowances where appropriate. (4) Travel and subsistence for scientifically justified visits of up to 1 year

Length of Study: 5 years

Frequency: Annual

Application Procedure: A preliminary application form should be completed and submitted by the published deadline. It should be sent electronically (as a Word document), with the requested accompanying information, to the appropriate funding stream at the Trust (see website). If successful, you will be invited to submit a full application

Closing Date: Varies; refer to website www.wellcome.ac.uk/funding/biomedical-science/funding-schemes/fellowships/basic-biomedical-fellowships/wtd004431.htm

Funding: Trusts

For further information contact:

Tel: (44) 20 7611 5757

Email: sciencegrants@wellcome.ac.uk

Research Fellowships

Subjects: Social and ethical aspects of biomedicine and healthcare

Purpose: Due to the multidisciplinary nature of research on the social and ethical aspects of biomedicine and healthcare, Research Fellowships may provide postdoctoral researchers with support to enable them to obtain research training, either in a new discipline or in a new aspect of their own field, e.g. a humanities scholar who wishes to be trained in social science. In such cases, the requested training must form a substantial component of the proposed research and should not normally be available via the standard funding routes, e.g. by learning new skills as a postdoctoral researcher on a project grant. The

requested training should also include methodologies and skills that are new to the applicant. Research training provision can include participation in taught courses, and periods spent in other research groups gaining practical, technical or other skills for introduction to the sponsor's or individual's own group

Eligibility: You are eligible to apply if you are a postdoctoral scholar who is not in a tenured or otherwise long-term established post. Fellowships must be held at a United Kingdom, Irish or low- or middle-income country institution. You will also be expected to have been awarded your PhD before you are eligible to apply. Applications from candidates who are still awaiting their viva by the time of the full application will not normally be accepted

Level of Study: Research

Type: Fellowship

Value: An award will not normally exceed £250,000, exclusive of any standard Wellcome Trust allowances. Fellowships provide a salary, plus appropriate employer's contributions. Essential research expenses, including travel and fieldwork, are available, as is a set amount for travel to conferences, seminars and other meetings of a scholarly nature

Length of Study: 3 years

Application Procedure: Preliminary applications should be made in writing, and include: a brief curriculum vitae and full publication list; details of research proposed (maximum of 1 page); a letter of support from the head of department in which you will be working; the approximate cost of the proposal, broken down into equipment and project running expenses

Closing Date: January round – 22 January is closing date for preliminary applications and 30 March is closing date for full applications, The schedule for full applications received by 30 March closing date is as follows: May is shortlisting and July: interviews; for July round – Dates are to be confirmed

Funding: Trusts

Additional Information: The maximum duration of the awards is 3 years. The awards are full-time but can be tenable on a part-time basis if a case can be made that personal circumstances require this

For further information contact:

Tel: (44) 20 7611 5757

Email: MHgrants@wellcome.ac.uk

Research Training Fellowships

Subjects: Medical, dental, veterinary or clinical psychology

Purpose: Provide support for medical, dental, veterinary and clinical psychology graduates who have little or no research training, but who wish to develop a long-term career in academic medicine

Eligibility: The fellowship is open to individuals with a relevant connection to the European Economic Area (EEA) for fellowships to be held in a United Kingdom or Republic of Ireland institution. Non-United Kingdom candidates should contact the office for advice before submitting an application. 1. Medical graduates must have passed the relevant exam for their specialty, e.g. MRCP, MRCS, MRCOphth/FRCOphth Part 1, MRCPsych, MRCOG Part 1, MRCPCH, FRCA Part 1. GPs are advised to contact the office to clarify their eligibility. 2. Dental candidates must have obtained MFD, MFDS, MGDS, MFGDP or equivalent. 3. Veterinary candidates should have a degree in veterinary medicine (e.g. BVSc, BVMS&S, BVMS, BVetMed, VetMB) and some experience in clinical practice. An intercalated degree is desirable, but not essential. 4. Clinical psychology candidates must have obtained a professional Doctorate-level qualification in Clinical Psychology accredited by the British Psychological Society before taking up the award. Candidates are advised to contact the office to clarify their eligibility. You are expected to undertake a high-quality research project that balances the provision of training with the opportunity to advance knowledge in a given area. A project based solely on a systematic review of a particular area is not suitable, unless it includes a significant element of methodological innovation

Level of Study: Postgraduate, Research

Type: Fellowship

Value: Fellowships are normally for 2–3 years. In exceptional cases a fellowship may be for up to 4 years for those who wish to undertake a relevant Master's training or diploma course. All training requests must be fully justified in the application. Fellowships provide research expenses (consumables, travel, and support to attend scientific meetings) and a fellow's salary, set according to age, experience and our policy on enhancement

Length of Study: 2–3 years

Application Procedure: Application form is available from the website

Closing Date: Varies; refer to the website www.wellcome.ac.uk/Funding/Biomedical-science/Funding-schemes/Fellowships/Clinical-fellowships/wtd004435.htm

Funding: Trusts

For further information contact:

Tel: (44) 20 7611 5757

Email: sciencegrants@wellcome.ac.uk

Science Media Studentships

Subjects: These studentships offer financial support for three PhD-level biomedical scientists to undertake postgraduate

qualifications at Imperial College London or the National Film and Television School (NFTS)

Purpose: We aim to increase the crossover between science and the media and to enable bright, articulate and motivated scientists to explore a career in the broadcast industry

Eligibility: Applicants should be PhD-level biomedical scientists wishing to explore a career in the broadcast, games and film industries. Applicants must have a PhD or equivalent, some experience of science communication, and a demonstrable aptitude for working with TV, radio, film or games

Level of Study: Postdoctorate, Research

Type: Studentship

Value: Awards will pay for tuition costs plus a grant to cover basic living expenses for the duration of the studentship

Frequency: Annual

Application Procedure: Application is through the Imperial College website

Closing Date: 26 February

Funding: Trusts

For further information contact:

Tel: (44) 20 7594 8753

Email: liam.watson@imperial.ac.uk

Contact: Liam Watson, Science Communication Group Administ

Seeding Drug Discovery

Subjects: The aim is to develop drug-like, small molecules that will be the springboard for further research and development by the biotechnology and pharmaceutical industry in areas of unmet medical need

Purpose: To facilitate early-stage small-molecule drug discovery. The awards help applicants with a potential drug target or new chemistry embark on a programme of compound discovery and/or lead optimization

Level of Study: Research

Type: Award

Value: Early-stage drug discovery projects are able to apply for funding for up to 2 years to facilitate screening of chemical compounds to identify one or more lead series of molecules. Late-stage projects, where a lead compound has already been identified, are able to apply for funding for up to 4 years, to support lead optimization and preclinical development through to clinical trials

Application Procedure: A preliminary application form should be completed and returned to Technology Transfer by the published deadline. Applications will be considered at one of the two Seeding Drug Discovery Committee meetings in each 12-month period. Successful applicants will be shortlisted and invited to complete a full application

Closing Date: Varies; refer to the website www.wellcome.ac.uk/Funding/Innovations/Awards/Seeding-Drug-Discovery/index.htm

Funding: Trusts

For further information contact:

Senior and Intermediate Research Fellowship for International Students

Subjects: Fellowship is awarded to support biomedical research that is relevant to human and animal welfare

Purpose: The aim of the fellowship is to support outstanding researchers of any nationality, either medically qualified or science graduates, who wish to pursue a research career in an academic institution in India

Eligibility: Applicants of any nationality are eligible to apply for the fellowship. Applicants must be a basic science/veterinary researchers with 4 -15 years of post-PhD research experience. Applicants must be fluent in English

Type: Research

Value: The fellowship has the tenure of five years and provides: The Fellow's personal support. Research expenses, including research assistance if required (normally funding for four research staff may be requested). The total award for a Senior Fellowship typically includes the costs requested by the applicant as well as the set contributions by the India Alliance. For further details, see costing policies. Costs requested by the applicant must be commensurate with their research proposal and should be fully justified in the full application. Inadequate justifications may result in costs being revised. Time permitted for non-research related activity during the fellowship is normally restricted to a maximum of eight hours each week

Study Establishment: Fellowship is awarded to support biomedical research that is relevant to human and animal welfare

Country of Study: India

Application Procedure: See the website

Closing Date: 15 January

Additional Information: For more details please visit the website scholarship-positions.com/senior-intermediate-research-fellowship-for-international-students-india/2018/01/02/

For further information contact:

Email: info@wellcomedbt.org

Senior Fellowships in Public Health and Tropical Medicine

Subjects: Biomedical science

Purpose: This scheme supports outstanding researchers from low- and middle-income countries to establish themselves as leading investigators at an academic institution in a low- and middle-income country location. This fellowship is the most senior of a series of career awards aimed at building sustainable capacity in areas of research that have the potential for increasing health benefits for people and their livestock in low- and middle-income countries. Research projects should be aimed at understanding and controlling diseases (either human or animal) of relevance to local, national or global health

Eligibility: Candidate must be a graduate in a subject relevant to public health or tropical medicine (for example; biomedical or social science, veterinary medicine, physics, chemistry or mathematics) with a PhD and at least 5 years' postdoctoral experience, or a medical graduate with a higher qualification equivalent to membership of the United Kingdom Royal College of Physicians (i.e. qualified to enter higher specialist training), or be recognized as a specialist within a relevant research area, and have at least 5 years' research experience

Level of Study: Postgraduate, Research

Type: Fellowship

Value: A basic salary; research expenses (e.g. consumables, equipment, collaborative travel, research assistance, technical support), training costs where appropriate and justified; an inflation/flexible funding allowance and support to attend scientific meetings; and contributions to costs of the project that are directly incurred by the overseas institution may also be provided

Length of Study: Up to 5 years

Application Procedure: You are required to complete and submit a preliminary application form by the published deadline. The form should be emailed to phatic@wellcome.ac.uk. Completed forms will normally be assessed within 1 month of the preliminary deadline. If your preliminary application meets the scheme's requirements, a full application will be invited

Closing Date: Varies; refer to the website www.wellcome.ac.uk/Funding/Biomedical-science/Funding-schemes/Fellowships/Public-health-and-tropical-medicine/wtd025884.htm

Funding: Trusts

Additional Information: Overseas allowances will be provided for periods of training or collaborative research spent outside the home institution country, where appropriate. Research-dedicated costs (excluding salary costs) should not exceed £100,000 per year

For further information contact:

Tel: (44) 20 7611 5757

Email: sciencegrants@wellcome.ac.uk

Senior Research Fellowships in Basic Biomedical Science

Subjects: Biomedical science

Purpose: To provide support for outstanding postdoctoral scientists based in academic institutions in the United Kingdom and Republic of Ireland (RoI)

Eligibility: The fellowship is open to individuals with a relevant connection to the EEA. You should have between 5 and normally 10 years' research experience (from the date of your viva to the date of your preliminary application) at postdoctoral level, or veterinary equivalent, and have a substantial record of publications in your chosen area of research in leading international journals. Candidates that do not hold an established post may apply to remain in their current laboratory, to return to one where they have worked before or to move to a new laboratory in the United Kingdom or Republic of Ireland. Candidates that hold an established post are not eligible to apply for a fellowship to be held at their current employing institution. However, we are willing to consider a preliminary application where a candidate wishes to move institution and is able to make an appropriate justification for the move. The Trust does not normally accept resubmissions of full applications for its fellowships. Please contact the Office for further advice. You must have an eligible sponsor and host institution in the United Kingdom or Republic of Ireland who can guarantee space and resources for the tenure of the award

Level of Study: Postdoctorate, Research

Type: Fellowship

Value: The fellowship is for 5 years in the first instance, and provides a basic salary, as determined by the host institution (normally up to £55,000 per year) with an additional Trust supplement of £12,500 per year; the essential costs of the research programme (e.g. consumables, equipment, research assistance, overseas allowances, collaborative travel and subsistence); an inflation and Flexible Funding Allowance; and support to attend scientific meetings

Frequency: Annual

Application Procedure: A preliminary application form should be completed and submitted electronically (as a Word document) to the relevant funding stream (see website) no later than the published deadline. Full application forms will usually be sent to shortlisted candidates within 1 month of the preliminary deadline. In the full application, if invited, the host institution will be required to confirm that it will support a successful renewal of the fellowship under the shared funding arrangement for the full period of any renewal

Additional Information: Refer to the website www.wellcome.ac.uk/funding/biomedical-science/funding-schemes/fellowships/basic-biomedical-fellowships/wtd004442.htm

Closing Date: Varies

Funding: Trusts

For further information contact:

Tel: (44) 20 7611 5757

Email: sciencegrants@wellcome.ac.uk

Senior Research Fellowships in Clinical Science

Subjects: Biomedical science

Purpose: This scheme provides support for clinical investigators to further develop their research potential and to establish themselves as leading investigators in clinical academic medicine

Eligibility: You must have a relevant connection to the EEA. If you are a non-United Kingdom candidate, please contact the Office for advice before submitting a preliminary application. You should be a clinical scientist with a medical, dental, veterinary or clinical psychology qualification and will normally have no more than 15 years' clinical and research experience from the date of your first medical, dental, veterinary or British Psychological Society-accredited psychology qualification. (Due allowance will be given to those whose career has been affected by a late start or interruption for personal/family reasons.) Successful candidates will have made significant progress towards establishing themselves as independent clinical investigators. A research degree (PhD/MD), together with evidence of advanced (postdoctoral) research training (typically at least 3–5 years), is expected. They will have published consistently in their chosen area of research, placing substantive papers in leading journals. Candidates will not normally hold a tenured academic post in a university in the United Kingdom or Republic of Ireland, or a consultant post in the NHS

Level of Study: Postgraduate, Research

Type: Fellowship

Value: The fellowship is for 5 years in the first instance, and provides: a basic salary, as determined by the host institution; research expenses; an inflation allowance and support to attend scientific meetings; provision for public engagement cost

Frequency: Annual

Application Procedure: A preliminary application form should be completed and submitted by the published deadline. It should be sent electronically (as a Word document), with the requested accompanying information, to the appropriate funding stream at the Trust (see website). Incomplete or incorrectly completed forms will not be accepted. Faxed applications will not be accepted. Please do not send any additional material. You will be notified in writing of your success, or otherwise, in reaching the next round of the competition. In

some instances, we may recommend that candidates apply for an Intermediate Clinical Fellowship

Closing Date: Varies; refer to the website www.wellcome.ac.uk/funding/biomedical-science/funding-schemes/fellowships/clinical-fellowships/wtd004445.htm

Funding: Trusts

For further information contact:

Tel: (44) 20 7611 5757

Short-term Research Leave Awards for Clinicians and Scientists

Subjects: Medical history and humanities

Purpose: This scheme enables clinicians, scientists and other healthcare professionals to undertake up to 6 months (FTE) of research at a centre or department with academic expertise in medical humanities, to explore the wider determinants and contexts of their own medical and scientific work

Eligibility: You should be a scientist, clinician or healthcare professional holding an established post to which you would return on completion of the award. You must be resident in the United Kingdom or Republic of Ireland. You should have a record of publication in medical or scientific journals

Level of Study: Research

Type: Award

Value: We will provide the salary of a locum or replacement lecturer for the duration of the award, and a set amount for travel to conferences

Length of Study: Up to 6 months

Application Procedure: You should submit a preliminary application in writing, including: a brief curriculum vitae, a full publication list and confirmation that your personal support is from the Higher Education Funding Council; details of the research proposed (maximum one page); details of hours spent on teaching and administration; the approximate cost of the proposal, broken down into staff salaries, equipment and running expenses

Closing Date: 23 January (preliminary applications for January round); July (preliminary applications for July round). For further detail check website www.wellcome.ac.uk/Funding/Medical-humanities/funding-schemes/personal-awards/wtd003761.htm

Funding: Trusts

Sir Henry Wellcome Postdoctoral Fellowships

Subjects: Biomedical science

Purpose: To provide a unique opportunity for the most promising newly qualified postdoctoral researchers to make an early start in developing their independent research careers, working in the best laboratories in the United Kingdom and overseas

Eligibility: These awards are open to individuals with a relevant connection to the European Economic Area. You must be in the final year of your PhD studies or have no more than 1 year of postdoctoral research experience from the date of your PhD viva to the full application submission deadline (e.g. if the full deadline is in February, your viva should not have occurred prior to last February). Time spent outside the research environment will be taken into consideration. You must have an eligible sponsoring institution in the United Kingdom or Republic of Ireland that will administer the fellowship for the full duration of the award

Level of Study: Postdoctorate, Research

Type: Fellowships

Value: 4 year full-time fellowship. Provides an award of £250,000

Length of Study: 4 years

Frequency: Annual

Application Procedure: You should complete and submit a preliminary application form by the published deadline. It should be sent electronically (as a Word document), with the requested accompanying information, to the relevant funding stream at the Trust. Your preliminary application will be assessed within 4 weeks of the submission deadline. If successful, you will be invited to submit a full application. Your full application will be peer reviewed by the relevant Funding Committee and, if successful, you will be shortlisted for interview

Closing Date: Varies; refer to the website www.wellcome.ac.uk/Funding/Biomedical-science/Funding-schemes/Fellowships/Basic-biomedical-fellowships/wtx033549.htm

Funding: Trusts

For further information contact:

Strategic Awards in Biomedical Science

Subjects: Biomedical science

Purpose: Strategic Awards provide flexible forms of support to excellent research groups with outstanding track records in their field

Eligibility: Applications will be considered from principal applicants who meet our eligibility criteria and are recognized international leaders in their field

Level of Study: Research

Type: Award

Value: It provides equipment, support staff, consumables, training programmes, networking, biological, clinical or epidemiological research resources. Limited capital building or refurbishment essential to the programme can also be requested

Length of Study: Awards are normally for 5 years

Application Procedure: You (prospective applicant) are required to submit a preliminary application, which should include the following information: (1) your track record, you must complete the curriculum vitae pages (these are questions 14 and 15 from the standard project grant application form); (2) high-level aims and objectives, and how the proposal addresses the strategic challenges in the Wellcome Trust's Strategic Plan (maximum of two pages); (3) key targets, milestones and management structures, if appropriate (maximum of two pages); (4) duration of support requested and outline costings broken down into main headings (e.g. staff, equipment); (5) a statement from the head of the institution, indicating how the proposal fits within the context of the institution's strategic vision and what financial commitment the institution will make to the group if the application is successful. If your preliminary application is successful, you will be invited to submit a full application. The relevant form will be provided at this time

Closing Date: Refer website

Funding: Trusts

For further information contact:

Training Fellowships in Public Health and Tropical Medicine

Subjects: Biomedical science

Purpose: This scheme provides researchers from low- and middle-income countries—who are at an early stage in the establishment of their research careers—with opportunities for research experience and high-quality research training in public health and tropical medicine. Research projects should be aimed at understanding and controlling diseases (either human or animal) of relevance to local, national or global health. This can include laboratory-based molecular analysis of field or clinical samples, but projects focused solely on studies in vitro or using animal models will not normally be considered under this scheme

Eligibility: Applications are only accepted in the Public Health and Tropical Medicine Interview Committee remit. This covers research on infectious and non-communicable diseases within the fields of public health and tropical medicine that is aimed at understanding and controlling diseases (either human or animal) of relevance to local, national or global health. You must be a national or legal resident of a low- and middle-income country and should be either: (1) a graduate in a subject relevant to public health or tropical medicine (e.g. biomedical or social science, veterinary medicine, physics, chemistry or mathematics) with a PhD and no more than 3 years' postdoctoral experience, or (2) a medical graduate with a higher qualification equivalent to membership of the United Kingdom Royal Colleges of Physicians (i.e. qualified to enter higher specialist training) and some initial research experience. Applicants may also apply if they do not have a PhD, but have a clinical, basic or Master's degree and some initial research experience, with the expectation that they will register for a PhD

Level of Study: Postgraduate, Research

Type: Fellowship

Value: It provides support that includes a basic salary for the fellow, research expenses (e.g. consumables, equipment, collaborative travel, research assistance, technical support) training costs where appropriate and justified, an inflation/flexible funding allowance and support to attend scientific meetings, and contributions to costs of the project that are directly incurred by the overseas institution may also be provided

Length of Study: 3 years

Application Procedure: You are required to complete and submit a preliminary application form by the published deadline. The form should be emailed to phatic@wellcome.ac.uk. Completed forms will normally be assessed within 1 month of the preliminary deadline. If the preliminary application meets the scheme's requirements, you will be invited to submit a full application

Closing Date: Varies; refer to the website www.wellcome.ac.uk/Funding/Biomedical-science/Funding-schemes/Fellowships/Public-health-and-tropical-medicine/wtd025882.htm

Funding: Trusts

Translation Fund

Subjects: Projects covering any aspect of technology development from a range of disciplines—including physical, computational and life sciences—will be considered. Projects must address an unmet need in healthcare or in applied medical

research, offer a potential new solution, and have a realistic expectation that the innovation will be developed further by the market

Purpose: Translation Awards are response-mode funding designed to bridge the funding gap in the commercialisation of new technologies in the biomedical area

Eligibility: Projects must address an unmet need in healthcare or in applied medical research, offer a potential new solution, and have a realistic expectation that the innovation will be developed further by the market. Institutions: eligible institutions are not-for-profit research institutions, including those funded by the Medical Research Council, Cancer Research United Kingdom, and Biotechnology and Biological Sciences Research Council, in the United Kingdom. Institutions are normally required to sign up to a short funding agreement and the Grant Conditions. Companies: we are able to use our charitable monies to fund commercial companies to meet our charitable objectives through programme-related investment (PRI). For further details please refer to our policy on PRI. Companies will normally be expected to sign up to specific terms relating to the scheme. Overseas organizations: United Kingdom organizations may contract or collaborate with overseas organizations. Although overseas organizations are not eligible for Translation Awards, some proposals may be invited for consideration as a Strategic Translation Award (including Seeding Drug Discovery). Overseas organizations should contact Technology Transfer staff about their proposed project in the first instance. Principal applicants and coapplicants: applicants should normally hold a position of responsibility within the eligible organization and be able to sign up to or comply with the conditions or terms of an award. In addition, postdoctoral research assistants—whether seeking their own salary as part of the grant proposal, funded by the Wellcome Trust on another grant, or funded by another agency—are eligible for coapplicant status if they make a significant contribution to a research proposal and have agreement from their funding agency. Other eligibility information: Disciplines outside biomedicine – researchers from disciplines outside biomedicine can apply providing the application of research is designed to facilitate or meet a need in healthcare. For example, the application of physics, chemistry, computing, engineering and materials science to the development of medical products is entirely appropriate. Healthcare need in an area that is not commercially attractive. We are committed to the translation of research into practical healthcare benefits across the full spectrum of disease. Disease areas neglected by industry because of the lack of a return on investment pose a particular problem, but imaginative ways forward can sometimes be developed (e.g. public-private partnerships such as the Medicines for Malaria Venture). Intellectual property rights (IPR)/publications – if there are any restrictions on IPR or publications arising from your research, you must provide a written statement that details them. Restrictions on

intellectual property may affect your eligibility to apply to the Trust. Please refer to our Grant Conditions

Level of Study: Research

Type: Award

Value: The important criterion is to develop the innovation to the point at which it can be adopted by another party. Providing it is adequately justified, modest equipment purchase and maintenance costs may be included in a Translation Award application. Building or refurbishment expenditure will not normally be considered. Applications may not include requests for academic institutional overheads. If you hold a tenured university post, you may not re-charge your salary (in full or part) to a Translation Award

Application Procedure: A preliminary application form must be completed and sent to Technology Transfer by the published deadline. Preliminary applications are subject to a triage for shortlisting for the full application stage. Applications will be considered by the Technology Transfer Challenge Committee (TTCC), which meets twice a year. Full applications will be invited following the triage meeting. Shortlisted applicants will be invited to submit a full application and will be subject to international peer review and due diligence. Applicants will be expected to make a presentation on their proposal to the TTCC. Unless otherwise advised, this will be at the next scheduled meeting of the TTCC

Closing Date: Concept note deadline: 15 April; Preliminary deadline: 12 June

Funding: Trusts

Translational Medicine and Therapeutics Programmes

Subjects: Biomedical science

Purpose: This flagship scheme established four high-quality integrated research training programmes for clinicians in translational medicine and therapeutics. The programmes have been developed around a unique partnership between academic and industrial partners. Support for the programmes has been provided to the host institutions by GlaxoSmithKline, Wyeth Research, Roche, AstraZeneca, Sanofi-Aventis, Sirtris Pharmaceuticals and PTC Therapeutics

Eligibility: You should have demonstrated the potential to pursue a career as an academic clinician. It is anticipated that many applicants will have already commenced their specialist training, but this is not essential

Level of Study: Postgraduate, Research

Value: Includes a clinical salary, PhD registration fees at United Kingdom/EU rate, research expenses, contribution towards travel, and a contribution towards training costs

Length of Study: Support varies

Frequency: Annual

Application Procedure: If you are interested in applying you should contact the relevant programme. Please see website for details

Closing Date: October

Funding: Trusts

For further information contact:

Email: j.williams@wellcome.ac.uk

University Awards

Subjects: Medical history and humanities

Purpose: This scheme allows universities to attract outstanding research staff by providing support for up to 5 years, after which time the award holder takes up a guaranteed permanent post in the university. A monograph and other substantial publications are expected to result from an award, so teaching and other non-research commitments are expected to be minimal during the period of full Wellcome Trust support

Eligibility: You must be nominated by your prospective head of department and have an undertaking from the head of the institution, vice-chancellor, principal or dean that your personal support will be taken over by the institution at the end of the award. Support is normally available only at lecturer level, although in exceptional cases awards to senior-lecturer level may be possible

Level of Study: Research

Type: Award

Value: Up to 5 years' support is available, providing your full salary for 3 years, 50% in the fourth year and 25 per cent in the fifth year. Travel expenses to attend meetings are provided for 5 years, but research expenses are provided for the first 3 years of the award only

Application Procedure: Initial enquiries about the scheme may be made by you (the potential candidate) or a department in an institution. These enquiries should be followed by a preliminary application from you by email or post including an explicit statement from the head of the institution, vice-chancellor or dean demonstrating the institution's commitment to the history of medicine field, and a statement confirming that the institution will provide 50% salary costs in year four, 75% in year 5 and full salary thereafter; curriculum vitae and full publication list; an outline of no more than two pages of the proposed project; a letter of support from the head of department, including a statement on your expected teaching/administrative load for the 5-year period (this can be

sent by separate cover); the approximate cost of the proposal, broken down into your salary, equipment and project running costs

Closing Date: 22 January (closing date for preliminary applications); 30 March closing date for full applications; The schedule for full applications received by 30 March closing date is as follows: May is shortlisting and July is interview

Funding: Trusts

Wellcome Trust and NIH Four-Year PhD Studentships

Subjects: Biomedical science

Purpose: This scheme provides opportunities for the most promising postgraduate students to undertake international, collaborative four-year PhD training based in both a United Kingdom/Republic of Ireland (RoI) academic institution and the intramural campus of the National Institutes of Health at Bethesda (Maryland, United States of America)

Eligibility: You should be a United Kingdom/European Economic Area (EEA) national with (or be in your final year and expected to obtain) a first- or upper-second-class honours degree or an equivalent EEA graduate qualification. You must have: (1) a suitable doctoral supervisor at an eligible academic host institution in the United Kingdom or Republic of Ireland. The host institution must be able to confer doctoral degrees; (2) a suitable supervisor at a NIH institute. The NIH supervisor should hold a tenured or tenured-track position for the proposed period of the award and should be willing to provide funding for the student whilst at the NIH

Level of Study: Doctorate, Research

Type: Studentship

Value: The studentship is awarded for 4 years with support provided by the Wellcome Trust (in the United Kingdom/Republic of Ireland) and the NIH (in the United States of America). Our funding will provide support for the student's stipend, PhD fees, college fees (if required) and a contribution towards research costs

Length of Study: 4 year

Frequency: Annual

Application Procedure: The application form should be completed and submitted by the closing date. An electronic copy (as a Word document) should be emailed to wtnih@wellcome.ac.uk. One signed hard copy should be addressed to the Wellcome Trust-NIH PhD studentship's at the Trust's postal address, see website

Closing Date: 2 November (Deadline for applications); 25–26 January (Shortlisted candidate interviews)

Funding: Trusts

For further information contact:

Wellcome Trust-NIH PhD Studentships, Wellcome Trust, Gibbs Building, 215 Euston Road, NW1 2BE, Bloomsbury, United Kingdom

Email: wtnih@wellcome.ac.uk

Wellcome Trust-POST Fellowships in Medical History and Humanities

Subjects: Medical history and humanities

Purpose: This scheme enables a PhD student or junior fellow funded through the Wellcome Trust Medical History and Humanities (MHH) programme to undertake a 3-month fellowship at the Parliamentary Office of Science and Technology (POST)

Eligibility: Applicants should be in the second or third year of their PhD or in the first year of a fellowship funded by the MHH Programme. POST is a strictly non-partisan organization. Wellcome Trust-POST Fellows will be required to abstain from any lobbying or party political activity, and generally uphold the principles of parliamentary service, including a commitment to confidentiality, during their time with the Office. All provisionally selected candidates must sign a declaration to this effect. They must also receive security clearance from the parliamentary security authorities as a condition of finally taking up the fellowship

Level of Study: Postdoctorate, Research

Type: Fellowship

Value: The successful applicant will receive a fully funded 3-month extension to their PhD or fellowship award. While placements typically last 3-months, they may be extended under exceptional circumstances. If the successful applicant is not within reasonable daily travelling distance to POST in London, the Wellcome Trust will consider paying travel and accommodation costs up to a maximum of £2,000

Frequency: Annual

Application Procedure: An application should include the application form, your curriculum vitae, a letter of support from your sponsor/supervisor and a summary of a proposed topic for a POST publication. The summary should be no longer than 1,000 words and should demonstrate: why you think this subject would be of particular parliamentary interest; how the training you have received and your research to date will enable you to carry out this work; your ability to

write in a style suitable for a parliamentary (rather than an academic) audience

Closing Date: 23 November

Funding: Trusts

Additional Information: Check website for more details

Wells Mountain Foundation

Woodcock-Munoz Foundation Empowerment Through Education Scholarships

Subjects: The Wells Mountain Foundation, through the Empowerment Through Education (ETE) program, provides undergraduate scholarships to developing country nationals to study in their home country or a neighboring country

Purpose: The Foundation believes in the power and importance of community service; therefore, all scholarship participants are required to volunteer for a minimum of 100 hours a year

Eligibility: WMF's ideal candidate is a student, male or female, from a country in the developing world, who: 1. Successfully completed a secondary education, with good to excellent grades. 2. Will be studying in their country or another country in the developing world. 3. Plans to live and work in their own country after they graduate. 4. Has volunteered prior to applying for this scholarship and/or is willing to volunteer while receiving the WMF scholarship

Level of Study: Graduate

Type: Scholarship

Value: Average of US\$1,400 for tuition and fee, books and materials

Frequency: Annual

Country of Study: Any country

Application Procedure: You must submit a complete application via the online scholarship application portal (preferred method) or via postal mail to the Foundation's office. Kindly check the below site for further details. www.wellsmountainfoundation.org/our-programs/scholarships/

Closing Date: 1 April

Funding: Private

For further information contact:

Email: info@scholars4dev.com

Wells Mountain Initiative

Westmead Millennium Institute Micro-Grants

Purpose: The WMI Micro-Grants Program is open exclusively to all WMI Graduate Scholars. Preference is given to Graduates who are actively involved in Fellowship groups if present within their nation and participation in WMI's Scholar Journey opportunities

Eligibility: Graduate Scholars are eligible to apply for a maximum of two grants. There is a required two-year wait time before applying for a second award

Level of Study: Graduate

Type: Grant

Value: US\$100 to US\$1,000

Frequency: Annual

Country of Study: Any country

Application Procedure: To enhance professional growth with all aspects of program development and grant writing skills, WMI provides all Graduate Scholars with individualised application coaching. After submitting your first round proposal, the review committee will provide direct feedback for each qualifying application. With this feedback, Graduate Scholars will have one month to continue developing their proposals by creating more detailed processes, conducting research and community outreach, revising budgets and timelines, etc. A final revised application will be submitted online and a funding decision will be made

Closing Date: 15 April

Funding: Private

Additional Information: You could also write to the following contact address: info@wellsmountaininitiative.org

The Whitehall Foundation, Inc. through its programme of grants and grants-in-aid, assists scholarly research in the life sciences. It is the Foundation's policy to assist those dynamic areas of basic biological research that are not heavily supported by federal agencies or other foundations with specialized missions.

Whitehall Foundation Grants-in-Aid

Subjects: Neurobiology focusing on invertebrate and vertebrate neurobiology, specifically investigations of neural

mechanisms involved in sensory, motor and other complex functions of the whole organism as these relate to behaviour
Purpose: To better understand behavioural output or brain mechanisms of behaviour

Eligibility: Open to researchers at the assistant professor level who have experienced difficulty in competing for research funds as they have not yet become firmly established. Senior scientists may also apply

Level of Study: Research

Type: Research grant one year

Value: Up to US\$30,000

Length of Study: 1 year

Frequency: Annual

Country of Study: United States of America

Application Procedure: Applicants must contact the Foundation

Closing Date: Letter of intent deadline, 15 January, 15 April, 15 October

Funding: Private

Additional Information: For up to date policy, application information and important calendar deadlines please refer to the website

For further information contact:

Wingate Scholarships

2nd Floor, 20-22 Stukeley Street, London WC2B 5LR, United Kingdom

Email: enquiries@wingate.org.uk

Website: www.wingatescholarships.org.uk

Contact: Ms Sarah Mitchell, Administrator

Wingate Scholarships are awarded to individuals for creative or original work of intellectual, scientific, artistic, social or environmental value of great potential or proven excellence, and to outstanding musicians for advanced training in music performance.

Wingate Scholarships

Subjects: Most subjects except undergraduates, masters, first year PhDs, postdoctoral fellowship posts, medical research, fine arts, performing arts (except music), business courses, taught courses or courses leading to professional qualifications and electives. See eligibility section

Purpose: To fund creative or original work of intellectual, scientific, artistic, social or environmental value and advanced music study

Eligibility: Open to United Kingdom, Commonwealth, former Commonwealth, Israeli. Also open to European Union and Council of Europe country citizens provided that they are and have been resident in the United

Kingdom for at least 3 years at start of award. Applicants must be over 24 years of age. No upper age limit is prescribed. No academic qualifications are necessary. Applications must be made in United Kingdom from a valid United Kingdom address

Level of Study: Doctorate, Postdoctorate, Postgraduate, Research

Type: Scholarship

Value: Costs of a project, which may last for up to 3 years, to a maximum of United Kingdom £10,000 in any 1 year

Length of Study: 1–3 years

Frequency: Annual

Study Establishment: Any approved institute or independent research

Country of Study: Any country

No. of awards offered: 228

Application Procedure: Applicants must be living in United Kingdom during the period of application. Applications from a valid United Kingdom address only are acceptable. Applicants must complete online application form from the website. Applicants must be able to satisfy the Scholarship Committee that they need financial support to undertake the work projected, and show why the proposed work (if it takes the form of academic research) is unlikely to attract Research Council, British Academy or any other major agency funding if they are United Kingdom applicants. All applications require two references to be submitted independently. Guidance is available on the website

Closing Date: 1 February

Funding: Foundation

Contributor: HHW Foundation

No. of awards given last year: 39

No. of applicants last year: 228

Additional Information: The scholarships are not awarded for professional qualifications, taught courses or electives, or in the following subject areas: performing arts, fine art, business studies. Practising musicians (not composers) are eligible for advanced training, but apart from that, all applicants must have projects that are personal to them and involve either creative or original work. Only postgraduate students in their final two years can apply for scholarships to enable them to undertake field work, or in exceptional circumstances where an award has been withdrawn or closed, to complete a PhD. Applications for studies or projects undertaken post doctorally are eligible, but not postdoctoral fellowship posts per se. Applicant must be based in United Kingdom when applying

The Winston Churchill Foundation of the United States was established in 1959 as an expression of American admiration for one of the great leaders of the free world. The foundation enables outstanding American students to attend graduate school at the University of Cambridge.

Churchill Scholarship

Subjects: Math, science, or engineering

Purpose: The Churchill Scholarship provides funding to American students for a year of Master's study at the University of Cambridge, based at Churchill College. The program was set up at the request of Sir Winston Churchill in order to fulfill his vision of United States–United Kingdom scientific exchange with the goal of advancing science and technology on both sides of the Atlantic, helping to ensure our future prosperity and security

Eligibility: An applicant for the Churchill Scholarship must be a citizen of the United States, either native born or naturalized, and must be a senior who is enrolled in one of the institutions participating in the Scholarship Program or a student who has graduated from one of those institutions within the past 12 months. Upon taking up the Churchill Scholarship, a Churchill Scholar must hold a bachelor's degree or an equivalent, and may not have attained a doctorate

Type: Fellowship/Scholarship

Value: US\$55,000

Length of Study: 1 year

Frequency: Annual

Country of Study: United Kingdom

No. of awards offered: 105

Application Procedure: Must be nominated by undergraduate institution

Closing Date: 31 October

Website: www.wsworkshop.org
Contact: Ms Ann Kalmbach, Executive Director

The Women's Studio Workshop (WSW) is an artist-run workshop with facilities for printmaking, papermaking, photography, book arts and ceramics. WSW supports the creation of new work through studio residency and annual book arts grant programmes and an ongoing subsidized fellowship programme. WSW offers studio-based educational programming in the above disciplines through its annual Summer Arts Institute.

Artists Fellowships at WSW

Subjects: Intaglio, water-based silkscreen, photography, papermaking or ceramics, letterpress, book arts, ceramics
Purpose: To provide a time for artists to explore new ideas in a dynamic and co-operative community of women artists in a rural environment
Eligibility: Open to women artists only
Level of Study: Unrestricted
Type: Fellowship
Value: The award includes on-site housing and unlimited access to the studios. Cost to artists will be US\$200 per week, plus their own material
Length of Study: Each fellowship is 3–6 weeks long. Fellowship opportunities are from September to June
Frequency: Annual

Woodrow Wilson MBA Fellowship in Education Leadership

Subjects: MBA. The Fellowship program will provide specialized preparation in areas such as leadership, finance, human resources, organizational change—all focusing on education

Purpose: To address the United States' twin educational achievement gaps—the one between the nation's lowest performing and its best schools, as well as the one between the nation's best schools and their top international competitors. The Fellowship seeks both to prepare leaders who can bring all American schools up to world-class levels of performance and to develop a new gold standard for preparing education leaders

Eligibility: Fellows commit to serve for 3 years in approved school or district leadership positions within their states

Level of Study: Postgraduate

Type: Fellowship

Value: Fellows will receive a stipend to cover tuition for the MBA program and other expenses

Length of Study: The program will require 13–15 months of full-time study, depending on the institution—two summers and an academic year

Frequency: Annual

Country of Study: Any country

Application Procedure: Fellows must be nominated by a local education leader/colleague before they are eligible to

apply. Contact information buntrock@woodrow.org. The program will require 13 to 15 months of full-time study, depending on the institution—two summers and an academic year

Closing Date: December

Additional Information: If you have already been nominated, see the respective pages for the WW MBA Fellowship at MSOE (www.msoe.edu/community/academics/business/page/2311/mba-in-education-leadership-overview) and at UIndy (uindy.edu/education/mba-education-leadership) for application deadlines

Woodrow Wilson Teaching Fellowship

Subjects: Teacher education, STEM (Science, Technology, Engineering, Mathematics) teaching, secondary school teaching

Eligibility: The Woodrow Wilson Teaching Fellowship seeks to attract talented, committed individuals with science, technology, engineering, and mathematics (STEM) backgrounds – including current undergraduates, recent college graduates, midcareer professionals, and retirees – into teaching in high-need secondary schools. A qualified applicant should demonstrate a commitment to the program and its goals; have United States citizenship or permanent residency; have attained, or expect to attain by 30 June, a bachelor's degree from an accredited United States college or university; have majored in and/or have a strong professional background in an STEM field; have achieved a cumulative undergraduate grade point average (GPA) of 3.0 or better on a 4.0 scale (negotiable for applicants from institutions that do not employ a 4.0 GPA scale). Note: Prior teaching experience does not exclude a candidate from eligibility. All applications are considered in their entirety and selection is based on merit

Level of Study: Graduate

Type: Fellowship

Value: US\$30,000-US\$32,000 stipend, with tuition arrangements varying by campus in Georgia, Indiana, and New Jersey. (Once Fellows are certified teachers at the end of the first year, they obtain salaried employment in high-need schools.)

Length of Study: 12–18 months plus 3-year teaching commitment

Frequency: Annual

Study Establishment: Fellowship is only available for use at specific schools in Indiana (Ball State University, Indiana University-Purdue University Indianapolis, Purdue University, and the University of Indianapolis); Michigan (Eastern Michigan University, Grand Valley State University, Michigan State University, University of Michigan, Wayne State

University, Western Michigan University); and Ohio (John Carroll University, Ohio State University, University of Akron, and University of Cincinnati)

No. of awards offered: 1690

Application Procedure: Online application procedure and supporting documents. See www.wvteachingfellowship.org

Closing Date: First application deadline – 16 October, Second application deadline 30 November and final application deadline 31 January

Funding: Government, Private, Foundation

Contributor: Ohio STEM, Lilly Endowment Inc., W K Kellogg Foundation, Choose Ohio First

No. of awards given last year: 260

No. of applicants last year: 1690

Additional Information: University of Dayton and University of Toledo are also included in study establishment
