Corrigendum

Corporate Reputation and Financial Performance of Life Insurers

Tsai-Jyh Chen

The Geneva Papers (2016) 41, 528. doi:10.1057/gpp.2016.13; published online 13 April 2016

Correction to: *The Geneva Papers on Risk and Insurance—Issues and Practice* (2016) doi:10.1057/gpp.2016.8; published online 16 March 2016

This article has been corrected as of 13 April 2016. The definition of ROI in Table 1 on page 8 was erroneously published and has now been amended to the following:

$2 \times \text{net investment incomes} / (2 \times \text{mean total assets-net investment incomes})$ of firm i in year t

No other element of the article is under question.

Table 1 Definitions of the variables

Variable	Definition
$CorpRP_{i,t}$	= score of recommendation of firm i in year t
$lnExp_{i,t}$	= ln (business expenses) of firm i in year t
$Complaints_{i,t}$	= no. of complaints/no. of contracts in force of firm i in year t
$ROA_{i,t}$	= net incomes/mean total assets of firm i in year t
$Debt_{i,t}$	= total liabilities/total assets of firm i in year t
$FHC_{i,t}$	= 1 if firm i in year t is a subsidiary of a financial holding co.
$FI_{i,t}$	= 1 if firm i in year t with >50% of equities held by foreigners
$lnPremNC_{i,t}$	= ln (premium incomes of new contracts) of firm i in year t
$ROI_{i,t}$	= $2 \times \text{net investment incomes} / (2 \times \text{mean total assets-net investment incomes})$ of firm i in year t
