1 A base weighted (1995=100) combination of the separate price indices for contractors' output in the six new work sectors. For a fuller description see *Economic Trends* No 297.

2 From Aug 2005 data is from the Regulated Mortgage Survey. From February 2002, data are based on a significantly enlarged return from the Survey of Mortgage Lenders, and are calculated through improved methodology. Annual and quarterly data prior to February 2002 are from the 5% Survey of Mortgage Lenders, and have been rebased to Feb 2002=100.

3 Indicates values which are considered less reliable than the remainder currently published mainly due to the lack of market coverage.

4 The Climate Change Levy was introduced in April 2001. Further information on PPI is available from the National Statistics Website: [www.statistics.gov.uk/pps](http://www.statistics.gov.uk/pps)

1 Series based on prices at the mortgage completion stage collected through the Regulated Mortgage Survey. The index takes into account the mix of properties sold.

2 The series starts at February 2002 rather than January 2002 because the required volume of completions was achieved from that date only.

1 The above table of 20 industries was first published in the Monthly Digest in May 2002 (as table 18.11). The new set of 20 industry sectors was introduced as it better reflects the current state of the economy. Data are available in two formats: excluding bonus and including bonus, with each available as an index value and as an annual percentage change. An article covering the reasons for change can be found on our website: [www.statistics.gov.uk/labour](http://www.statistics.gov.uk/labour).

2 Users should note that the data contained in the previous set of 26 industry sectors are not comparable with the new set of 20 industry sectors.
