## Thanks to reviewers and sources of submissions

We thank our reviewers wholeheartedly because the most challenging task we have as journal editors is finding colleagues willing to review submissions and to complete the reviews.

Reviewers give us advice and help the authors of promising submissions to make them better. We give special thanks to those who helped us with multiple reviews.

We received about 350 submissions in calendar 2016 from 61 countries and sent 94 of them to the outside reviewers listed below. Our authors regularly express their gratitude for the constructive guidance. We thank all *JPHP* reviewers for the invaluable help:
