TENURE TRACK OPENING

Assistant Professor of Theoretical and Applied Mechanics

Qualified applicants are invited to submit applications for a tenure track position of ASSISTANT PROFESSOR in the College of Engineering starting in the FALL SEMESTER 1985. Applicants should have a doctorate in mechanics or related fields and should have interests in both teaching and research. Teaching duties will include both undergraduate as well as graduate instruction in mechanics and applied mathematics and supervision of graduate student research. Preference will be given to applicants with interests in **SOLID MECHANICS** or related areas. An interest in interdisciplinary research between mechanics and related fields is also desired.

Send resume, transcript of records, abstract of thesis, copies of relevant papers, and names of three references before February 1, 1985 to Professor Francis C. Moon, Chairman, Department of Theoretical and Applied Mechanics, Thurston Hall, Cornell University, Ithaca, NY 14853.

Cornell University is an Equal Opportunity and Affirmative Action Employer

OPEN POSITION

The Engineering Mechanics Department, University of Wisconsin-Madison, is seeking applicants for a faculty position in applied mechanics at the assistant, associate or full professor rank beginning August 1985. All areas of interest will be considered. Applicants with an interest in experimental mechanics or materials are especially encouraged to apply. Duties include teaching undergraduate and graduate courses in Mechanics, supervising graduate students and attracting sponsored research, and providing University and Departmental service as needed.

Applicants should send complete resumés, including three references, to:

> Professor P.G. Kessel, Chairman Department of Engineering Mechanics University of Wisconsin-Madison 1415 Johnson Drive Madison, WI 53706

The University of Wisconsin-Madison is an affirmative action/equal opportunity employer.

IN ORDER TO INSURE CONSIDERATION FOR THIS POSITION, THE DEADLINE FOR RECEIPT OF **APPLICATIONS IS APRIL 15, 1985.**

Proceedings—1983 SESA Fall Meeting

The 1983 SESA (now SEM) Fall Meeting generated numerous high-quality technical papers on the theme, 'Recent Advances in **Experimental Characterization of** Composites.' Several additional topics were considered as well. The 160-page, soft-bound proceedings includes the following meeting titles.

- Stiffness Reductions During Tensile Fatigue Testing of Graphite/Epoxy Angle-Ply Laminates, by E.M. Odom and D.F. Adams • Transverse Sensitivity Effects of Strain Gages on Orthotropic Composite Materials, by M.E. Tuttle and H.F. Brinson Transverse Loading of Sandwich Beams, by I.M. Allison • Dynamic Tensile Tests of Composite Material Using a Split Hopkinson Pressure Bar, by C.A. Ross, W.H. Cook and L.L. Wilson Development of Experimental Techniques for Measurement of Damping in Composite Materials, by S.A. Suarez, R.F. Gibson and L.R. Deobald • Biaxial Testing of Composite Tubes, by G.R. Toombes, S.R. Swanson and D.S. Cairns • Structural Modification and Modal Analyses, by V.W. Snyder • Single and Multiple Input Modal Analysis for Automotive Structures, by C. Van Karsen and R.J. Allemang • Applying Small Computers to Undergraduate Instruction in Engineering Mechanics at the University of Minnesota, by T.V. Galambos and A. Wassyng • Acoustic Emission -- A Complementary Inspection Method for Fiberreinforced Plastic Components, by R.J. Davies and M.J. Peacock · Prerequisites to the Development of a Viable NDE Technology for Composite Materials, by H.H. Chaskelis
- Member price: \$27.00 Nonmember price: \$32.00 Mail order with check or money order to: SEM (formerly SESA), 14 Fairfield Drive, Brookfield Center. CT 06805; (203) 775-6373
