ERRATA

**Erratum: “‘Noninverted’ Interference Fringes upon Light
Reflection from a Fabry-Perot Interferometer
with an Asymmetric Diffraction Mirror”
[Optics and Spectroscopy 97, 308 (2004)]**

V. S. Terent’ev and Yu. V. Troitskiĭ

On page 308 in the left-hand column the sentence on lines 19–24 should read: “First, it should have a high reflection coefficient R_2 for the light incident from the inside of the interferometer in order to ensure, in combination with a high-reflectivity mirror M_2 , the multiple reflection of light needed for multiple-beam interference.”

In the text and in the figure captions the words “multilayer layer” should read “multilayer”.
