DOI: 10.1134/S0001434609070165

In the English translation of the article “Extension of Congruences on Semirings of Continuous Functions” by D.V.Chuprakov and E.M.Vechtomov, the following footnote was added: “*Translator’s note.* Along with replacing the addition by $\vee$, the multiplication must be replaced by the addition $+$.” The assertion of this footnote is erroneous: indeed, as the authors point out at the beginning of the article, the objects under study are semifields of continuous positive functions with the classical multiplication operation, and, in the context of the footnote, while addition must be replaced by $\vee$, the multiplication remains the same and must not be replaced by anything else.

The editors of the English translation express their apologies to the authors and to the readers of their article for this unfortunate mistake.
