(i) The inequality $z \geq 1$ above Eq. (1) should be replaced by $z \geq 0$.

(ii) The factors δ_1 and δ_2 should be omitted in the denominators on the right-hand sides of two inequalities below Eq. (13). After that, both inequalities have the same form

$$n^2 > \frac{\delta_1 \varepsilon_{02} - \delta_2 \varepsilon_{01}}{\delta_1 - \delta_2}.$$
