Formula (14) should have the form

$$\mathcal{L}_4^{\text{eff}} = -\frac{\sqrt{\lambda}}{16\pi}(\partial\mathbf{n} \circ \partial\mathbf{n})^2 - \frac{1}{6\pi}(\partial \cdot \partial\mathbf{n})^2 - \frac{1}{4\pi}\partial \cdot \partial\mathbf{n} \partial \circ \partial\mathbf{n} - \frac{1}{12\pi}(\partial \circ \partial\mathbf{n})^2.$$
