ERRATUM TO: “ACTION OF A LOCAL TIME-PERIODIC LOAD ON AN ICE SHEET WITH A CRACK”

[Journal of Applied Mechanics and Technical Physics
58 (6), 1069–1082 (2017)]

L. A. Tkacheva

DOI: 10.1134/S0021894418020232

In the original publication, the second formula on page 1077 was misspelled.
It should read:

$$\sum_{j=-2}^{\infty} \frac{(\alpha_j^2 + \nu s^2)(a_1 \alpha_j + a_3 \alpha_j^3)}{K_2'(\alpha_j, s)(\beta_2 \mu_j^4 + 1 - \delta_2)} = \frac{1}{2\pi i} \int_{-\infty}^{\infty} \frac{(\alpha^2 + \nu s^2)(a_1 \alpha + a_3 \alpha^3) d\alpha}{K_2(\alpha, s)(\beta_2(\alpha^2 + s^2)^2 + 1 - \delta_2)}$$

$$- \sum_{k=1}^2 \frac{(\eta_k^2 + \nu s^2)(a_1 \eta_k + a_3 \eta_k^3)}{K_2(\eta_k) 4\beta_2 \eta_k (\eta_k^2 + s^2)} = - \sum_{j=-2}^{\infty} \frac{(\alpha_j^2 + \nu s^2)(-a_1 \alpha_j - a_3 \alpha_j^3)}{K_2'(-\alpha_j, s)(\beta_2 \mu_j^4 + 1 - \delta_2)} + \frac{1}{4\beta_2 \lambda^2} \sum_{k=1}^4 \frac{(\eta_k^2 + \nu s^2)(a_1 \eta_k + a_3 \eta_k^3)}{\eta_k (\eta_k^2 + s^2)}$$

$$\eta_k = \pm \left(\pm i \left(\frac{1 - \delta_2}{\beta_2} \right)^{1/2} - s^2 \right)^{1/2}.$$
