The generic name *Kurenkovia* was introduced by myself (Melnikova, 1981) for a new ostracod from the Middle Ordovician of the Moiero River (Middle Siberia). D.A. Sidorov paid attention to the fact that this name was earlier used by Sokolskaya (1969) to designate an oligochaete genus from the Kamchatka Peninsula. Therefore, according to Article 60.3 of the *International Code* ... (1999), I introduce the new generic name *Kurenkovina* to replace the preoccupied name *Kurenkovia*, which is also given in honor of the micropaleontologist V.G. Kurenkova (with the type species *Kurenkovia mononodosa* Melnikova, 1981).

ACKNOWLEDGMENTS

I am sincerely grateful to D.A. Sidorov (Institute of Biology and Soil Sciences, Far East Branch, Russian Academy of Sciences), who indicated the homonymy.
