We described a new conodont genus, *Muellerina* Bardashev et Bardasheva, 2012, with the type species *Muellerina idrisovi* Bardashev et Bardasheva, 2012, from the Middle Devonian (Givetian Stage) of Tajikistan (Bardashev and Bardasheva, 2012). It turned out that this generic name is a junior homonym of *Muellerina* Bassiouni, 1965 (Crustacea, Ostracoda) (Bassiouni, 1965). In connection with the homonymy, we introduce for the Middle Devonian conodont genus a new name, *Muellerilepis* Bardashev et Bardasheva, nom. nov., with the same type species.

ACKNOWLEDGMENTS

We are grateful to A.S. Alekseev, who paid attention to the fact that the former name is preoccupied.
