A synonymy of *Cottus dybowskii* with *Myoxocephalus brandtii* had been incorrectly indicated.

Actually this nominal species is conspecific with *M. stelleri*, which can be confirmed by the proportions of the head and by the variegated pattern on its ventral surface mentioned in the brief redescription of the

holotype, by which the aforementioned species of sculpins can be distinguished.

The correct synonymy is the following: *Cottus dybowskii* Hilgendorf, 1879 = *Myoxocephalus stelleri* Tilesius, 1811.
