COMMEMORATING THE JOURNAL'S
85th ANNIVERSARY

The 85th Anniversary of the Journal of Physical Chemistry

DOI: 10.1134/S0036024415110126

The first edition of *Zhurnal Fizicheskoi Khimii* (Journal of Physical Chemistry), the successor to *Zhurnal Russkogo Fiziko-Khimicheskogo Obshchestva* (The Journal of the Russian Physicochemical Society), published since 1879, came out in 1930. The Journal's first Editorial Board included such outstanding chemists and physicists as V.A. Kist'yakovskii, N.S. Kurnakov, L.V. Pisarzhevskii, A.I. Rabinovich, N.N. Semenov, Ya.K. Syrkin, Ya.I. Frenkel', A.N. Frumkin, N.A. Shilov, and E.V. Shpol'skii. The Editorial Board was headed by eminent scientists whose names are associated with outstanding investigations in the important field of physical chemistry: N.N. Semenov, M.I. Temkin, N.A. Izgoshev, A.N. Frumkin, Ya.I. Gerasimov, and V.M. Gryaznov.

Zhurnal Fizicheskoi Khimii was translated entirely into English by the British Library for more than 15 years and was issued under the name *Russian Journal of Physical Chemistry*. Since 1993, it has been simultaneously published in English under the same name (*Russian Journal of Physical Chemistry A* since 2007) according to a license agreement between the Russian Academy of Sciences and Pleiades Publishing's MAIK Nauka/Interperiodica, and distributed by Springer.

Works by physical chemists in the countries of the CIS are featured prominently in the Journal. In recent years, *Zhurnal Fizicheskoi Khimii* (*Russian Journal of Physical Chemistry A*) has received growing numbers of articles from scientists in China, Germany, India, Iran, Italy, Japan, Poland, Serbia, Turkey, and other countries. The number of articles presented for publication in the Journal has risen in recent years, testifying not only to its high authority but also the restoration of scientific schools in the field of physical chemistry for which Russia and the countries of the CIS have been famous throughout the Journal's lifetime.

Over the years, our coworkers on the Editorial Staff and members of the Editorial Board have always treated the authors of submitted articles with courtesy, care, and encouragement. I ask my colleagues to accept my sincere gratitude for their work. I wish you good fortune in all your endeavors, and continued success to *Zhurnal Fizicheskoi Khimii* (*Russian Journal of Physical Chemistry A*).

V.V. Lunin,
Editor-in-Chief, Academician,
Russian Academy of Science
