DOI: 10.1134/S0361768814060188

On page 167, the list on lines 15–19 (right column):

- many systems of various kinds share common software components (for example, simulation of one or other optical phenomenon);
 - frequent outputs of new versions;
 - restricted resources and time
- should move to lines 27–31 (left column).
