In my article “Calculation of Pressure Pulsations for a Turbulent Heterogeneous Medium” published in Doklady Physics, vol. 52, no. 7, pp. 384–387 (2007), one should read the following:
page 385 after formula (4),

$$L = \left(\frac{\mu_{Lf} e_L}{\rho_L \varepsilon_L} \right)^{1/2} \text{ and } \varepsilon_L = \frac{\mu_L}{\rho_L} \overline{\frac{\partial u'_{iL}}{\partial x_k} \frac{\partial u'_{jL}}{\partial x_k}};$$

page 386 after formula (8),

$$L_k = \left(\frac{v^3}{\varepsilon} \right)^{1/4}.$$
