1. Figure 6 on page 290 should be the following:

Fig. 6. ROS accumulation into Photofrin® mediated RD cells with suitable dose of 630 nm wavelength of light in the presence of molecular oxygen.

2. Figure 7 on page 291 should be the following:

Fig. 7. (a) Microscopic images of Control RD cells. (b) Gross view of mitochondrial staining with MitoTracker Red Photofrin® (5 µg/ml) treated Rhabdomyosarcoma cells (RD). (c) RD cells treated with (50 µg/ml) of Photofrin®. (d) Mitochondrial staining image of Photofrin® (80 µg/ml) treated Rhabdomyosarcoma cells (RD).

3. Page 291, right column, last paragraph, sentence “On mitochondrial staining, RD cells (Fig. 7a) were displaying faint (non-significant) diffused red fluorescence.” should read “On mitochondrial staining, RD cells (Fig. 7b) were displaying faint (non-significant) diffused red fluorescence.”

4. Page 292, left column, last sentence of the first paragraph “Same experiment was repeated for the different concentrations of Photofrin® (50, 80, and 100 µg/ml) as shown in Figs. 7b, 7c, and 7d.” should read “Same experiment was repeated for the different concentrations of Photofrin® (50 and 80 µg/ml) as shown in Figs. 7c and 7d.”
