Congratulations to A.A. Markov

DOI: 10.1134/S1061830908100112

Anatolii Arkad'evich Markov, Dr. Sci. (Engr.), the director of the Scientific and Engineering Complex of Nondestructive Testing Facilities of OAO Radioavionika, celebrated his 60th birthday on October 14, 2008. Markov is the author of more than 200 scientific publications, including 46 inventions, devoted mainly to problems of creating efficient facilities for ultrasonic testing of railway rails and other objects.

As a professor of the Department of Nondestructive Testing Methods and Instruments of St. Petersburg State University of Railway Transport, Markov actively participates in training engineers for railway transport.

The Editorial Board of *Nondestructive Testing* cordially congratulates Prof. Markov on his birthday and wishes him good health and further creative achievements.
