The expression for C in the formula (45)

$$C = \frac{2(1+12D)z_2 - 5(1+3D)c_2}{1 - c_1 - z_2}$$

should be replaced by

$$C = \frac{2(1+12D)z_2 - 5(1+3D)c_2}{K(k^2)(1 - c_1 - z_2)}.$$
