Formula (2.11) contains a misprint. Its corrected form should read

$$\sigma(ab \rightarrow R \rightarrow cd) = \frac{16\pi(2J_R + 1)}{(2J_a + 1)(2J_b + 1)\bar{\lambda}^2(m_a, m_b; \sqrt{s})} \frac{\Gamma_R^{ab}(s)\Gamma_R^{cd}(s)}{|P_R(s)|^2}. \quad (1.1)$$

The respective modification in Eqs. (2.12), (3.4), (3.6), and (3.8) is

$$\frac{k_a k_b}{k_R} \rightarrow \frac{k_R}{k_a k_b}, \quad (1.2)$$

where $k_a = 2J_a + 1$. The same modification should be made in the last formula of Appendix B.
