Formulas (17) and (21) should be read as follows:

$$\begin{aligned} \mu_r &:= \frac{\sqrt{\pi}\Gamma^2(r)\Gamma(2r+0.5) \cdot 2^{2r-1}(2r-1)}{\Gamma(2r)} \leq \lambda_{1,r} \\ &\leq \frac{\sqrt{\pi}\Gamma^2(r+1) \cdot 2^{2r+1}\Gamma(2r+1.5)}{(2r+1)\Gamma(2r+1)} =: \nu_r. \end{aligned} \tag{17}$$

$$\begin{aligned} \lambda_{q,r} &:= \frac{\sqrt{\pi}\Gamma^2(r)\Gamma(2r+0.5) \cdot 2^{2r-1}(2r-1)}{\Gamma(2r)} \left(1 + O\left(\frac{1}{r}\right)\right) \\ &= 2\pi\sqrt{2\pi r} \left(\frac{2r}{e}\right)^{2r} \left(1 + O\left(\frac{1}{r}\right)\right). \end{aligned} \tag{21}$$
