This review summarizes the results of research aimed at isolation and structural characterization of flavonoid compounds belonging to a new class, namely, spirobiflavonoids, from different plant sources.

Keywords: spiroflavonoids, structure, biosynthesis, biological activity, distribution, Larix sibirica Ledeb. Bark, Larix gmelinii (Rupr.) Rupr. Bark

DOI: 10.1134/S1068162011040017
