Page 878, formula

$$\frac{\partial y_{ii}}{\partial \alpha} = \left[\sum_{j \neq i} y_{ij} \frac{\partial (q_j^{norm})^{big}}{\partial \alpha} + y_{ii} \frac{\partial (q_i^{norm})^{big}}{\partial \alpha} + \sum_{j \neq i} \frac{\partial y_{ij}}{\partial \alpha} (q_j^{norm})^{big} \right] ((q_i^{norm})^{big})^{-1}. \quad (53)$$

should read

$$\frac{\partial y_{ii}}{\partial \alpha} = - \left[\sum_{j \neq i} y_{ij} \frac{\partial (q_j^{norm})^{big}}{\partial \alpha} + y_{ii} \frac{\partial (q_i^{norm})^{big}}{\partial \alpha} + \sum_{j \neq i} \frac{\partial y_{ij}}{\partial \alpha} (q_j^{norm})^{big} \right] ((q_i^{norm})^{big})^{-1}. \quad (53)$$
