In my paper, on p. 350, lines 9–11 from above, $r_x(t)$ must be replaced by κt^σ . The corresponding paragraph should read:

(3°) there exists a c_2 such that, for all $x \in G^0$ on $\{(y, t) : 0 \leq t \leq T, |y| < \kappa t^\sigma\}$, the function $(y, t) \rightarrow \gamma_{\gamma_x(t)+y}^{(0)}(t)$ is continuous; for all y , $|y| < \kappa t^\sigma$, the function $t \rightarrow \gamma_{\gamma_x(t)+y}^{(0)}(t)$ is piecewise smooth on $\{t : 0 \leq t \leq T, |y| < \kappa t^\sigma\}$ and

$$\left| \frac{\partial}{\partial t} \gamma_{\gamma_x(t)+y}^{(0)}(t) \right| \leq c_2.$$
