

Levon Mikhailovich Chailakhyan (1928–2009)

DOI: 10.1134/S0006350910030255

This issue of the Journal is dedicated to the memory of an outstanding scientist, Corresponding Member of the Russian Academy of Sciences, biologist-biophysicist Levon Mikhailovich Chailakhyan.

For many years he had been our colleague in “Biofizika”. We were amazed by the compass of his interests, his great erudition and prominence of achievements. His scientific activities spread from biophysics of the cell and cellular interactions to

development and physiology, from cloning to mysteries of brain and consciousness, to profound philosophical problems of general biology.

Levon Mikhailovich was a remarkably well-disposed and responsive man, loved by friends, colleagues, and students.
