*Dear Anatoly Moiseevich!*

*Congratulations on your wonderful anniversary! You are one of the most authoritative mathematicians both in our country and in the world. We are glad that you are celebrating this date in great shape and continue to tell us about the problems that are at the centre of your attention. Already in November of 1967, the year our journal was founded, the editors received a paper of yours. Your work published in our journal helped define its highest level and standards. As a member of the editorial board and the deputy head editor you largely define the authority of our journal in the world of mathematics.*

*We wish you good health and creative longevity.*

*The present and the following issues of our journal are dedicated to you.*

*Editorial Board*
