Formulas (1) on page 897 and (5) on page 898 should read as

$$\frac{\partial G}{\partial t} = -K(-\Delta)^{\alpha/2}G(\mathbf{r}, t) + \delta(t)\delta(\mathbf{r}), \quad (1)$$

$$\frac{\partial^\beta G}{\partial t^\beta} = -K(-\Delta)^{\alpha/2}G(\mathbf{r}, t) + \delta_\beta(t)\delta(\mathbf{r}). \quad (5)$$
