1. Page 1442, the first formula in (73) should read as follows:

$$\boldsymbol{\lambda}_{20} = [(\mathbf{I} + \mathbf{L}_0^{\prime(1)}(\varepsilon_1\mathbf{I} - \boldsymbol{\varepsilon}_m))(\mathbf{I} + 3^{-1}\varepsilon_1^{-1}(1 - v')$$
$$\times (\varepsilon_2 - \varepsilon_1\mathbf{I})) + v'\mathbf{L}_0^{\prime(1)}(\varepsilon_2 - \varepsilon_1\mathbf{I})]^{-1},$$

2. Page 1442, the formula (75) should read as follows:

$$\mathbf{E}_1 = (-\boldsymbol{\beta}^{(1)} + \varepsilon_1^{-1}[-3^{-1}(a^{(2)}/r)^3\mathbf{I} + (a^{(2)})^3$$
$$\times r^{-5}(\mathbf{r} \otimes \mathbf{r})]\boldsymbol{\alpha}^{(1)})\mathbf{E}_0,$$
