Figure 9 in the published article was not correct. This erratum provides correct Figure 9:

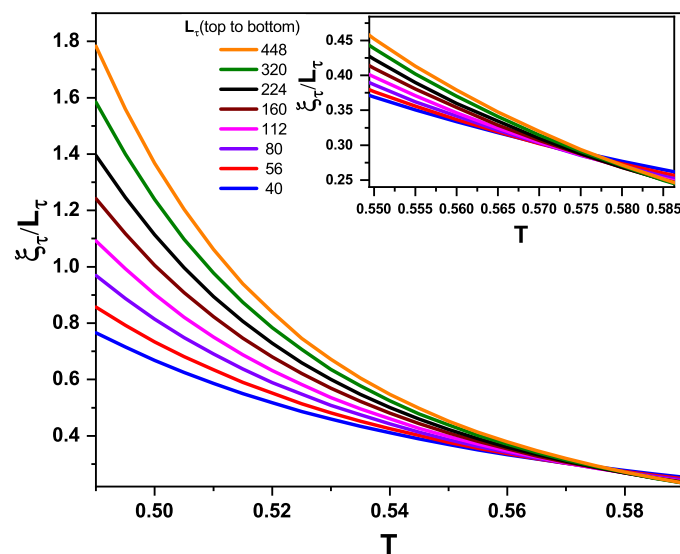

Fig. 9. Scaled correlation time ξ_τ/L_τ versus temperature T for different values of L_τ in the Griffiths region. The system size in space is $L = 1000$; the data are averaged over 2000 disorder configurations. The inset shows a magnification for the crossing point of the curves.

The Publisher apologizes for the inconvenience.
