The second of eqs. (15) should be replaced with

$$g(\epsilon) = \frac{r}{D_b} = \frac{1}{4 + 2\tilde{H}},$$

where  $\tilde{H}$  is calculated using eq. (14).

Equation (17) should be replaced with

$$\frac{k}{D^2} = \frac{\epsilon \frac{g(\epsilon)}{f(\epsilon)}}{3\delta_a \left[ \frac{R_n}{2} + R_c \left( \frac{1}{f(\epsilon)g(\epsilon)} - \xi \right) \right]}.$$

We stress that these errors do not concern the curves of fig. 7 of the paper, since these latter were drawn using the permeability and the  $g$  function as defined in this erratum.

We fully acknowledge Bruce Li Xueliang and Paul Stevenson for noticing these errors and thank them for their careful reading of the manuscript.
