It has come to the attention of the European Physical Journal Plus that the article “Crystal's anisotropic properties and tensor representation: a discussion” by E. Talebian and M. Talebian, Eur. Phys. J. Plus **126**, 128 (2011), should not have been published because it reproduces some work already published in:

- A.R. Verma, O.N. Srivastava, *Crystallography Applied To Solid State Physics* (New Age International, 1991) Chapt. 7;
- G. Bassani, G. Liedl, P. Wyder (Editors), *Encyclopedia of Condensed Matter Physics* (Elsevier, 2005) pp. 300–309;
- E. Fjær, R.M. Holt, A.M. Raaen, P. Risnes, P. Horsrud, *Petroleum Related Rock Mechanics*, second edition (Elsevier, 2008).

Consequently, this paper has been retracted by the European Physical Journal Plus and should not be cited or referred to in the future.
