Published online: 18 March 2011 – © Società Italiana di Fisica / Springer-Verlag 2011

After the on-line publication of the article the authors realized that they forgot to indicate a couple of amendments at the proofs stage which should have been inserted in their paper. We indicate them here below:

1) Equation (6) should read as follows:

$$P_{\text{cap}} = \frac{1}{2} \operatorname{erfc} \left[\left(\frac{\pi s_1 (\gamma - s_1)}{2 \hbar \mu (\omega_0^2 - s_1^2)} \right)^{1/2} \frac{\mu \omega_0^2 R_0 / s_1 + P_0}{[\gamma \ln(\gamma / s_1)]^{1/2}} \right]. \quad (6)$$

2) The following sentence should be added at the beginning of the acknowledgments:

We thank H.M. Jia and D. Lacroix for fruitful discussions and suggestions.
