In this Erratum, the wrong expression for the combination of the PPN parameters β and γ in front to the 1PN perihelion precession is corrected.

The correct expression of the combination of the PPN parameters β and γ appearing in Eq. (5) at page 549 of the original article is $(2 + 2\gamma - \beta) / 3$ instead of the incorrect one $(1 + 2\gamma - \beta) / 3$ displayed in the text.
