The original online version of this article has been updated. The incorrect image was initially published as Fig. 2; the correct figure and caption are shown below.

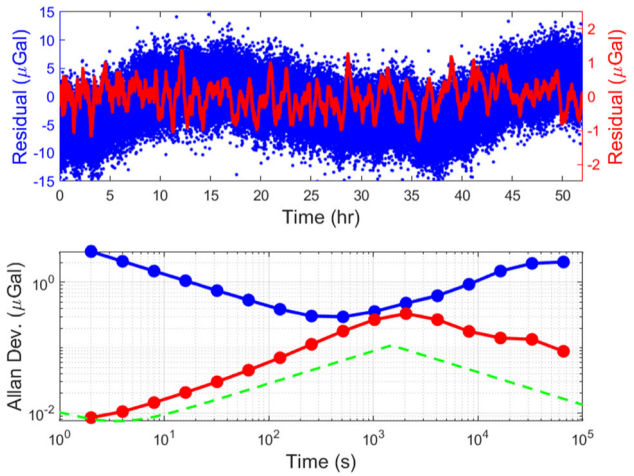

Fig. 2 Top: Residual acceleration by subtracting $g_0^{\mathrm{sim}}(n)$ from the simulated gravimeter readings of Set Two (blue) or the Kalman estimates (red). Bottom: Allan deviation calculated from the residual acceleration. The green dashed line is the precision limit of the Kalman estimator

The original article has been corrected. The publisher apologizes for the inconvenience.

The original article can be found online at https://doi.org/10.1140/epjd/s10053-024-00888-6.
