After publication of the article, mistakes were found:

In validation of results section, the range of the nanoparticle volume fraction is $0 \leq \phi \leq 0.2$ instead of $0.1 \leq \phi \leq 0.2$.

In the captions of figures 14 and 15, $\phi = 0.1$ has to be deleted from fixed parameters because the figures are versus ϕ .

In Conclusion No. 5, it should read “fluid friction irreversibility” instead of “skin friction irreversibility”.
