ERRATUM

Please note the following corrections to “An Example of an Unblinded, Third-Party Interim Analysis for Sample Size Re-estimation” by Simon Kirby, Scott McBride and Lohita Puvanarajan (*Drug Information Journal* 2003;37(3):317–320). These errors are not the fault of the authors but were inadvertently introduced while the pages were being revised.

Page 317, right column, paragraph 2, line 1, the symbol “ $\bar{I}$ ” should not be there.

Page 317, right column, paragraph 2, line 5, “ $\bar{x}$ ” has been omitted from between “and” and “is.”

Page 318, right column, first equation, in the expression for s_{adj}^2 , “ m_i ” has been printed instead of “ μ_i ” and “ m ” has been printed instead of “ μ .”

Page 319, in Table 1, the first number under “Mean estimated variance” should be “0.01275.”

Page 320, reference 8, the correct page numbers are 65–72.
