The Editors in Chief have retracted this article. After publication, concerns were raised about the appearance of the Western blots along with the following issues:

Unlikely appearance of the data presented in the flow cytometry histograms in Fig. 5A/E, in particular the unusually-looking peaks;

In Table 1 "Primer sequence", the putative PTEN primers appear to align to NF kappa B instead.

The authors provided quantification data for the Western blots but were unable to provide uncropped gels and blots. The Editors, therefore, have lost confidence in the integrity of the article's findings. The authors did not explicitly state whether they agree to this retraction.
