Throughout the article by S. Kruijff *et al.* [Ann Surg Oncol DOI 10.1245/s10434-009-0629-8, published online 2009 Jul 28] the concentration unit 'g/L' was used for S100B protein. This unit should have been 'µg/L', otherwise the references in Table 4 would be showing values 10⁶ fold higher than expected.
