ERRATUM TO: ANN SURG ONCOL DOI 10.1245/S10434-015-4429-Z

In the original article there is an error in the Results section of the abstract. The corrected sentence is as follows:

The mean L3 muscle index was significantly lower for the patients who experienced severe postoperative complications than for the patients without severe postoperative complications (43.3 vs. 47.0 cm²/m²; $p = 0.005$).

The same error occurred in the Results section on page 4, right column, of the original article. The corrected sentence is as follows:

The mean L3 muscle index was significantly lower for the patients who experienced severe postoperative complications (i.e., Clavien–Dindo classification ≥ 3) than for the patients without severe postoperative complications (43.3 vs. 47.0 cm²/m²; $p = 0.005$).

The online version of the original article can be found under doi:[10.1245/s10434-015-4429-z](https://doi.org/10.1245/s10434-015-4429-z).
