Department of Surgical Oncology, The Institute for Cancer Care Mercy Medical Center, Baltimore, MD

Pleural dissemination of peritoneal surface malignancies worsens patient survival and quality of life (<https://doi.org/10.1245/s10434-021-10298-2>). Cytoreductive surgery with hyperthermic intrathoracic chemotherapy performed at

specialized centers by experienced surgeons is a safe approach to the treatment of these patients that can improve their survival.
