Our scoping review identified 183 relevant papers reviewing diagnostics, surgical management, adjuvant therapies, and surveillance protocols (<https://doi.org/10.12>

[45/s10434-021-10468-2](https://doi.org/10.1245/s10434-021-10468-2)). Surgical resection and margin width should depend on tumor grade, and selective use of adjuvant radiation can decrease local recurrence.

**FUNDING** None.

**DISCLOSURES** Nicole Look Hong - Physician consultant for MOLLI Surgical.
